

Datasheet: ICT946

BATCH NUMBER 169187

Description:	MITOCHONDRIAL MEMBRANE POTENTIAL KIT
Name:	MITOCHONDRIAL MEMBRANE POTENTIAL MitoPT™ TMRE KIT
Format:	TMRE Mitochondrial Stain (Red Fluorescence)
Product Type:	Kits
Quantity:	500 TESTS

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Information

The MitoPT TMRE kit uses a quick and easy staining method to clearly differentiate between non-apoptotic and apoptotic cells through mitochondrial functionality.

Test Principle

An early indication of apoptosis involves a collapse in the electrochemical gradient across the mitochondrial membrane. Loss of mitochondrial membrane potential can be detected by a unique fluorescent cationic dye known as TMRE (tetramethylrhodamine ethyl ester), that has been incorporated into the MitoPT TMRE kit.

The MitoPT TMRE reagent easily penetrates cells and enters the mitochondria. It aggregates in the mitochondria of non-apoptotic cells and fluoresces bright orange/red, whilst in apoptotic cells it diffuses throughout the cell. Once dispersed, the reagent assumes a monomeric form and exhibits a reduced orange/red fluorescence level. This allows an easy distinction between apoptotic and non-apoptotic fluorescent cells which can be read with a flow cytometer, fluorescence microscope or a fluorescence plate reader using black microtitre plates.

Reagents In The Kit

MitoPT TMRE Reagent - lyophilized - to make up 1mM stock
 10x Assay Buffer, 125ml (x2)
 600uL 50mM carbonyl cyanide m-chlorophenylhydrazone (CCCP) concentrate in DMSO.

Instructions For Use Instructions for use can be found at www.bio-rad-antibodies.com/uploads/IFU/IFUICT946.pdf

Storage Store the unopened kit at -20°C. Once open, the 10x Assay Buffer can be stored at 2-8°C until the expiry date shown. Protect the MitoPT™ TMRE Reagent from light at all times. Once reconstituted, the MitoPT™ TMRE stock should be stored at -20°C, protected from light and thawed no more than twice.

Guarantee Guaranteed until date of expiry. Please see product label.

Acknowledgements MitoPT is a trademark of Immunochemistry Technologies, LLC.
