

Datasheet: LNK094PECY5.5 BATCH NUMBER 164995

Description						
Description:	LYNX RAPID RPE-Cy5.5 ANTIE	ODY CONJUGATION KIT				
Name:	RPE-Cy5.5 CONJUGATION KIT					
Format:	Kit					
Product Type:	Conjugation Kit					
Quantity:	3 CONJUGATIONS for 10µg an	ibody				
Product Details						
Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .

Product Information	LYNX Rapid RPE-Cy5.5 Antibody Conjugation Kit ® enables the rapid conjugation of a pre-prepared lyophilized mixture containing R-Phycoerythrin (RPE)-Cy5.5 label to an antibody or protein. Activation of proprietary reagents within the antibody-label solution results in directional covalent bonding of RPE-Cy5.5 to the antibody.					
		of RPE-Cy5.5 to the antibody. be used to label small quantities of	el solution			
Reagents In The Kit	results in directional covalent bonding The LYNX Rapid Conjugation kit® can antibody/protein at near neutral pH, all antibody recovery.	of RPE-Cy5.5 to the antibody. be used to label small quantities of owing a high conjugation efficiency with	el solution

Preparing The	results in directional covalent bonding The LYNX Rapid Conjugation kit® can antibody/protein at near neutral pH, all antibody recovery. 3 Vials of 10µg LYNX lyophilized RPE- 1 Vial LYNX Modifier reagent 1 Vial LYNX Quencher reagent	of RPE-Cy5.5 to the antibody. be used to label small quantities of owing a high conjugation efficiency with Cy5.5 mix mmended for preparing the antibody: S, MES, MOPS and phosphate) pH ran	el solution			
Preparing The	results in directional covalent bonding The LYNX Rapid Conjugation kit® can antibody/protein at near neutral pH, all antibody recovery. 3 Vials of 10µg LYNX lyophilized RPE- 1 Vial LYNX Modifier reagent 1 Vial LYNX Quencher reagent The following buffer solutions are recor 10-50mM amine-free buffer (e.g HEPE	of RPE-Cy5.5 to the antibody. be used to label small quantities of owing a high conjugation efficiency with Cy5.5 mix mmended for preparing the antibody: S, MES, MOPS and phosphate) pH ran ris buffer (<20mM) may be tolerated. nucleophilic components such as p	el solution h 100% nge 6.5-8.5 primary			

chemicals. Azide (0.02-0.1%), EDTA, up to 50% Glycerol and common non-buffering salts and sugars have little or no effect on conjugation efficiency.

Due to the large size of the RPE-Cy5.5 label the quantity of RPE-tandem dye is in slight molar excess. Approximately 10ug of IgG will give a 1:1 molar ratio of antibody:RPE. For optimal results the antibody should be at a concentration of 1mg/ml, with a maximum volume of 10ul and a maximum antibody amount of 10ug. Antibody at a concentration of greater than 1mg/ml requires dilution. Antibody below 1mg/ml can still be used as long as the maximum volume is not exceeded. Using less than the recommended amount of antibody may result in unbound label, but this will be removed during subsequent application wash steps. Antibody below 0.5mg/ml should be concentrated before use with the kit.

Instructions For Use	1. To the antibody sample add $1\mu I$ of the Modifier reagent for every $10\mu I$ of antibody and mix gently.
	2. Pipette the mixed antibody-modifier sample directly onto the LYNX lyophilized mix and gently pipette up and down twice to resuspend.
	3. Replace cap onto vial and incubate in the dark at room temperature (20-25 ^o C) for 3 hours, or overnight if preferred.
	4. After incubation, add 1µl of Quencher reagent for every 10µl of antibody used. Leave to stand for 30 minutes before use.

Storage	This kit contains lyophilized hygroscopic components that are moisture-sensitive. This kit is shipped under ambient conditions with silica packets to avoid exposure to moisture. On receipt, Bio-Rad recommend that the kit is stored at -20°C and protected from moisture. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing. Before opening, allow the components to reach room temperature to minimize condensation.
Guarantee	12 months from date of despatch
Acknowledgements	This product or portions thereof is manufactured under license from Carnegie Mellon University under U.S. Patent Number 5,268,486 and related patents. Cy and CyDye are trademarks of GE Healthcare Limited.

Licensed Use These products and the methodology of conjugation are patent protected under United Kingdom patent number 2446088 and associated international patent applications. The purchase of this product conveys to the buyer the limited, non exclusive non-transferable right (without the right to resell repackage or further sublicense) under these patents to use the product to make conjugates for research and development purposes only. The purchaser cannot sell or otherwise transfer this product, or its components, or materials or data made using this product, or its components to a third party. Further information on purchasing licenses for diagnostic and other uses may be obtained by contacting Bio-Rad, at. Endeavour House, Langford Business Park, Langford Lane, Kidlington, Oxon. OX5 1GE UNITED KINGDOM. Tel: +44 1865 852 700. E-mail: antibodies@bio-rad.com
