

Datasheet: MCA1039GA

Description:	RAT ANTI DOG CD8
Specificity:	CD8
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	YCATE55.9
Isotype:	lgG1
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>							
	rad-antibodies.com/protocols.							
	Flow Outomatry	Yes	No	Not Determined	Suggested Dilution 1/50 - 1/100			
	Flow Cytometry	-			1/50 - 1/100			
	Immunohistology - Frozen	-						
	Immunohistology - Paraffin ELISA							
	Immunoprecipitation							
	Western Blotting							
	Immunofluorescence Where this antibody has							
	necessarily exclude its us a guide only. It is recomn system using appropriate	nended th	nat the use	er titrates the antibody				
Target Species	Dog							
Product Form	Purified IgG - liquid							
Preparation	Purified IgG prepared by supernatant	affinity cl	nromatogr	aphy on Protein G fror	m tissue culture			
Buffer Solution	Phosphate buffered salin	е						
Preservative Stabilisers	0.09% sodium azide (Na	N ₃)						
Carrier Free	Yes							

Approx. Protein Concentrations	IgG concentration 1 mg/ml
Immunogen	Canine CD8 alpha chimaeric human IgG1 Fc fusion protein.
External Database Links	UniProt: <u>P33706</u> <u>Related reagents</u> Entrez Gene: <u>403157</u> CD8A <u>Related reagents</u>
Fusion Partners	Spleen cells from immunized DA rat were fused with cells of the Y3/Ag1.2.3 rat myeloma cell line.
Specificity	Rat anti Dog CD8 antibody, clone YCATE55.9 was clustered as Canine CD8 in the First Canine Leukocyte Antigen Workshop (<u>Cobbold <i>et al.</i> 1994</u>). YCATE55.9 reacts with a rat cell line transfected with cDNA for canine CD8 α (<u>Gorman <i>et al.</i> 1994</u>) and blocks MHC class I dependent T-cell responses <i>in vitro</i> and <i>in vivo</i> .
	Rat anti Dog CD8, clone YCATE55.9 has been shown to deplete circulating CD8+ T cells when administered to dogs <i>in vivo</i> . (Watson <i>et al.</i> 1993) Reduced levels of circulating CD8+ T cells has been associated with decreased survival times for dogs with osteosarcoma (Biller <i>et al.</i> 2010).
Flow Cytometry	Use 10µl of the suggested working dilution to label 1 x 10^6 cells in 100µl
