Datasheet: MCA1039PB BATCH NUMBER 1711

Description:	RAT ANTI DOG CD8:Pacific Blue®			
Specificity:	CD8			
Format:	Pacific Blue®			
Product Type:	Monoclonal Antibody			
Clone:	YCATE55.9			
Isotype:	lgG1			
Quantity:	100 TESTS/1ml			

Product Details

Applications	This product has been derived from testing w communications from information. For gener rad-antibodies.com/pro	ithin our labora the originators al protocol rec	atories, p s. Please	peer-reviewed publicate refer to references in	tions or personal dicated for further
		Yes	No	Not Determined	Suggested Dilution
	Flow Cytometry	-			Neat

	necessarily exclude its a guide only. It is reco systems with appropria	mmended that	t the use	r titrates the antibody	g dilutions are given as for use in their own
Target Species	Dog				
Product Form	Purified IgG conjugate	ed to Pacific Bl	ue® - liq	luid	
Max Ex/Em	Fluorophore	Excitation Ma	ıx (nm)	Emission Max (nm)	
	Pacific Blue®	410		455	
Preparation	Purified IgG prepared supernatant	by affinity chro	omatogra	aphy on Protein G fron	n tissue culture
Buffer Solution	Phosphate buffered sa	aline			
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum /	Albumin			
Approx. Protein Concentrations	IgG concentration 0.05	5 mg/ml

RRID	AB_1102342
Fusion Partners	Spleen cells from immunised DA rat were fused with cells of the Y3/Ag1.2.3 rat myeloma cell line.
Specificity	Rat anti Dog CD8 antibody, clone YCATE55.9 was clustered as Canine CD8 in the First Canine Leukocyte Antigen Workshop (<u>Cobbold <i>et al.</i> 1994</u>). YCATE55.9 reacts with a rat cell line transfected with cDNA for canine CD8 α (<u>Gorman <i>et al.</i> 1994</u>) and blocks MHC class I dependent T-cell responses <i>in vitro</i> and <i>in vivo</i> .
	Rat anti Dog CD8, clone YCATE55.9 has been shown to deplete circulating CD8+ T cells when administered to dogs <i>in vivo</i> . (Watson <i>et al.</i> 1993) Reduced levels of circulating CD8+ T cells has been associated with decreased survival times for dogs with osteosarcoma (Biller <i>et al.</i> 2010).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul.
