

Datasheet: MCA1075EL

BATCH NUMBER 1606

Description:	MOUSE ANTI HUMAN CD32:Low Endotoxin
Specificity:	CD32
Other names:	FcRII
Format:	Low Endotoxin
Product Type:	Monoclonal Antibody
Clone:	AT10
Isotype:	lgG1
Quantity:	0.5 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			20ug/ml
Immunohistology - Frozen (1)	•			1/500 - 1/1000
Immunohistology - Paraffin		•		
ELISA			•	
Immunoprecipitation	•			20ug/ml
Western Blotting			•	
Functional Assays				

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1)The epitope recognised by this antibody is reported to be sensitive to formaldehyde fixation and tissue processing. Bio-Rad recommends the use of acetone fixation for frozen sections.

Target Species
Species Cross
Reactivity

Human

Reacts with: Dog, Rhesus Monkey, Pig

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for

further information.

Product Form	Purified IgG - liquid		
Preparation	Purified IgG prepared by affinity chromatography on Protein A		
Buffer Solution	Phosphate buffered saline		
Preservative Stabilisers	None present		
Endotoxin Level	< 0.01 EU/ug		
Approx. Protein Concentrations	IgG concentration 1 mg/ml		
Immunogen	K562 cell line.		
External Database Links	UniProt: P12318 Related reagents P31994 Related reagents P31995 Related reagents Entrez Gene: 2212 FCGR2A Related reagents 2213 FCGR2B Related reagents 9103 FCGR2C Related reagents		
Synonyms	CD32, FCG2, FCGR2A1, IGFR2		
RRID	AB_10965067		
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse NS1 myeloma cell line.		
Specificity	Mouse anti Human CD32 antibody, clone AT10 recognizes the human CD32 antigen, a ~40 kDa glycoprotein that acts as a low affinity receptor for IgG (also known as Fc gamma RII). CD32 mediates several functions including endocytosis, activation of secretion, cytotoxicity and immunomodulation. CD32 is expressed by B cells, monocytes, granulocytes and platelets.		
	Mouse anti Human CD32 antibody, clone AT10 blocks the binding of IgG to Fc gamma RII (<u>Larsson et al. 1997</u>).		
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells or cells or 100ul whole blood.		
Histology Positive Control Tissue	Lymph node

Storage Store at -20°C only.

Storage in frost-free freezers is not recommended.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10162 available at: https://www.bio-rad-antibodies.com/SDS/MCA1075EL 10162
Regulatory	For research purposes only
