Datasheet: MCA1084GA

**Description:** MOUSE ANTI HORSE CD13

**Specificity:** CD13

**Other names:** AMINOPEPTIDASE N

**Format:** Purified

**Product Type:** Monoclonal Antibody

**Clone:** CVS19

**Isotype:** IgG1

**Quantity:** 0.1 mg

**Product Details**

**Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**Target Species**

Horse

**Product Form**

Purified IgG - liquid

**Preparation**

Purified IgG prepared by affinity chromatography on Protein G

**Buffer Solution**

Phosphate buffered saline

**Preservative Stabilisers**

0.09% Sodium Azide (NaN₃)

**Carrier Free**

Yes

**Approx. Protein Concentrations**

IgG concentration 1.0 mg/ml

**Immunogen**

Equine leucocytes.
**Fusion Partners**

Spleen cells from immunised mice were fused with cells of the mouse X63-Ag8.653 myeloma cell line.

**Specificity**

**Mouse anti Horse CD13 antibody, clone CVS19** recognizes the equine CD13 cell surface antigen, also known as Aminopeptidase N, a single-pass type II membrane protein belonging to the peptidase N family with a molecular weight of between 150 - 170 kDa.

CD13 is widely expressed by a range of cell types including all blood neutrophils, basophils, monocytes, fibroblasts, kidney epithelial cells, endothelial cells and mesenchymal stem cells, but not by T or B cells. It is involved in a broad spectrum of biological processes and is believed to be linked to a number of disease states including tumor invasion (Saiki *et al.* 1993).

Mouse anti Horse CD13 antibody, clone CVS19 may be used for differentiating myeloid and lymphoid lineage cells in tumors of the haematopoietic system.

In addition to clone CVS19, other **CVS** clones recognising equine MHC and cell surface antigens are available.

**Flow Cytometry**

Use 10ul of the suggested working dilution to label $10^8$ cells in 100ul.

**References**

**Storage**

Store at +4°C for one month or at -20°C for longer.

This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

**Guarantee**

18 months from date of despatch.

**Health And Safety Information**

**Regulatory**

For research purposes only
