

## Datasheet: MCA1193A647T

Description:	MOUSE ANTI HUMAN CD16:Alexa Fluor® 647		
Specificity:	CD16		
Other names:	FcRIII		
Format:	ALEXA FLUOR® 647		
Product Type:	Monoclonal Antibody		
Clone:	LNK16		
Isotype:	lgG1		
Quantity:	25 TESTS/0.25ml		

## **Product Details**

Applications	This product has been reported to work in the following applications. This information derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further							
	information. For gene	information. For general protocol recommendations, please visit <u>www.bio-</u>						
	rad-antibodies.com/pr							
		Yes No	Not Determined	Suggested Dilution				
	Flow Cytometry	•		Neat - 1/10				
	•	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as						
	a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.							
Target Species	Human	Human						
Product Form	Purified IgG conjugated to Alexa Fluor® 647 - liquid							
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)					
	Alexa Fluor®647	650	665					
Preparation	Purified IgG prepared by ion exchange chromatography from ascites							
Buffer Solution	Phosphate buffered saline							
Preservative	0.09% sodium azide (NaN <sub>3</sub> )							
Stabilisers	1% bovine serum albumin							
Approx. Protein Concentrations	IgG concentration 0.0

Synonyms	CD16A, CD16B, FCG3, FCGR3, IGFR3			
RRID	AB_1100858			
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse X63.653 myeloma cell line.			
Specificity	Mouse anti Human CD16 antibody, clone LNK16 recognizes CD16, a 50-65 kDa cell surface molecule which exists in two forms - a transmembranous form expressed by NK cells and some T cells, and a phosphatidylinositol linked form expressed by granulocytes. CD16 is a low affinity receptor for IgG (FcR III), and is an important receptor mediating ADCC by NK cells. Mouse anti Human CD16 antibody, clone LNK16 has been reported to block the binding of IgG to the CD16 molecule ( <u>Tamm and Schmidt 1996</u> ).			
Flow Cytometry	Use 10µl of the suggested working dilution to label $10^6$ cells or $100µl$ whole blood

Regulatory	For research purposes only
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/MCA1193A647T 10041
Acknowledgements	This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research. For information on purchasing a license to this product for purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad CA 92008 USA or outlicensing@thermofisher.com
Guarantee	12 months from date of despatch
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
