

Datasheet: MCA1209A647

BATCH NUMBER 165679

| Description: | MOUSE IgG1 NEGATIVE CONTROL:Alexa Fluor® 647 |
|---------------|--|
| Specificity: | MOUSE IgG1 NEGATIVE CONTROL |
| Format: | ALEXA FLUOR® 647 |
| Product Type: | Negative/Isotype Control |
| Isotype: | IgG1 |
| Quantity: | 100 TESTS/1ml |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|---------------------------|
| Flow Cytometry | | | | * |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| Target Species | Negative Control | | | | |
|-----------------------------------|---|---------------------|-------------------|--|--|
| Product Form | Purified IgG conjugated to Alexa Fluor® 647 - liquid | | | | |
| Max Ex/Em | Fluorophore | Excitation Max (nm) | Emission Max (nm) | | |
| | Alexa Fluor®647 | 650 | 665 | | |
| Preparation | Purified IgG prepared by affinity chromatography on Protein A from tissue culti supernatant | | | | |
| Buffer Solution | Phosphate buffered saline | | | | |
| Preservative | 0.09% sodium azide (NaN ₃) | | | | |
| Stabilisers | 1% bovine serum a | | | | |
| Approx. Protein Concentrations | IgG concentration | 0.05 mg/ml | | | |
| Immunogen | Human T lymphocy | ytes. | | | |

RRID

AB 322324

Fusion Partners

Spleen cells from immunized BALB/c mice were fused with cells of the NS1 mouse myeloma cell line.

Specificity

Mouse IgG1 Negative Control antibody is suitable for use as a negative control to assess non-specific binding of mouse IgG1 antibodies to target cells. Mouse IgG1 Negative Control antibody has been tested and found to be negative on the following rat cell types, peripheral blood leucocytes, thymocytes, splenocytes and macrophages.

Clone F8-11-13 recognizes the human CD45RA antigen, and therefore human leucocytes may be used as a positive control for this product. NOT SUITABLE FOR USE AS A NEGATIVE CONTROL ON HUMAN TISSUES

Flow Cytometry

Use 10µl of the suggested working dilution to label 106 cells in 100µl

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee

12 months from date of despatch

Acknowledgements

This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening

services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research. For information on purchasing a license to this product for purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad CA 92008 USA or outlicensing@thermofisher.com
