

Datasheet: MCA1227F BATCH NUMBER 156074

Description:	MOUSE ANTI HUMAN CD42a:FITC
Specificity:	CD42a
Other names:	GPIX
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	GRP-P
lsotype:	lgG1

Product Details

Applications	This product has been reported to work in the following applications. This information is						
	communications from the originators. Please refer to references indicated for further						
	information. For general protocol recommendations, please visit www.bio-						
	rad-antibodies.com/protocols.						
		Yes No	Not Determined	Suggested Dilution			
	Flow Cytometry	•		Neat			
	Where this antibody has not been tested for use in a particular technique this do necessarily exclude its use in such procedures. Suggested working dilutions are						
	a guide only. It is recommended that the user titrates the antibody for use in their own						
	system using appropri	ate negative/positiv	e controls.				
Target Species	Human						
Species Cross	Reacts with: Mink, Dog	9					
Reactivity	N.B. Antibody reactivity and working conditions may vary between species. Cross						
	reactivity is derived from testing within our laboratories, peer-reviewed publicat						
	personal communications from the originators. Please refer to references indi						
	further information.						
Product Form	Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid.						
Max Ex/Em	Fluorophore	Excitation Max (nr	n) Emission Max (nm))			
	FITC	490	525				
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture						
	supernatant						

Phosphate buffered saline
0.09% Sodium Azide 1% Bovine Serum Albumin
IgG concentration 0.1 mg/ml
Human red blood cells and platelets.
UniProt: P14770 Related reagents Entrez Gene: 2815 GP9 Related reagents

Spleen cells from immunised BALB/c mice were fused with cells of the mouse NS1 myeloma cell line.
Mouse anti Human CD42a antibody, clone GRP-P recognizes the platelet GPIX glycoprotein, a 23kDa surface marker expressed by platelets and megakaryocytes. Platelet GPIX is also known as CD42a. The CD42 complex is the major platelet receptor for von Willebrand factor.
Use 10ul of the suggested working dilution to label 10 ⁶ cells or 100ul whole blood

Storage	Store at +4°C or at -20°C if preferred.	
	This product should be stored undiluted.	
	Storage in frost free freezers is not recommended. This product should be protected from light.	t is photosensitive and
	Avoid repeated freezing and thawing as this may denature the product contain a precipitate we recommend microcentrifugatio	antibody. Should this n before use.
Guarantee	12 months from date of despatch	
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/MCA1227F 10041
