

Datasheet: MCA1230A488

Description:	RAT ANTI MOUSE CD49d:Alexa Fluor® 488
Specificity:	CD49d
Other names:	INTEGRIN ALPHA 4 CHAIN, VLA-4
Format:	ALEXA FLUOR® 488
Product Type:	Monoclonal Antibody
Clone:	PS/2
Isotype:	lgG2b
Quantity:	100 TESTS/1ml

Product Details

Applications This product has been reported to work in the following applications. This inform					tions. This information is
	derived from testing within our laboratories, peer-reviewed publications or personal				
	communications from t	he originators	. Please	refer to reference	s indicated for further
	information. For generation	al protocol rec	ommend	ations, please vis	it <u>www.bio-</u>
	rad-antibodies.com/pro	otocols.			
		Yes	No	Not Determined	Suggested Dilution
	Flow Cytometry	-			Neat
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as				
	a guide only. It is recor	nmended that	the user	titrates the produ	ict for use in their own
	system using appropria	ate negative/p	ositive co	ontrols.	
Target Species	Mouse				
Species Cross	Reacts with: Human				
Reactivity	N.B. Antibody reactivity	y and working	condition	ns may vary betw	een species. Cross
	reactivity is derived fro	m testing with	in our lab	ooratories, peer-re	eviewed publications or
	personal communication	ons from the o	riginators	s. Please refer to	references indicated for
	further information.				
Product Form	Purified IgG conjugated to Alexa Fluor® 488 - liquid				
Max Ex/Em	Fluorophore	Excitation Ma	x (nm) l	Emission Max (nm	1)
	Alexa Fluor®488	495		519	
Preparation	Purified IgG prepared I	by affinity chro	omatogra	phy on Protein G	from tissue culture
	supernatant				
Buffer Solution	Phosphate buffered sa	line			

Preservative Stabilisers	0.09% sodium azide (NaN ₃) 1% bovine serum albumin	
Approx. Protein Concentrations	IgG concentration 0.05 mg/ml	
Immunogen	P815 DBA/2 murine mastocytoma cells.	
External Database Links	UniProt: <u>Q00651</u> <u>Related reagents</u> Entrez Gene:	
	<u>16401</u> Itga4 <u>Related reagents</u>	
RRID	AB_566805	
Fusion Partners	Spleen cells from immunized Fisher rats were fused with SP2/0 mouse myeloma cells	
Specificity	Rat anti Mouse CD49d monoclonal antibody, clone PS/2 recognizes murine alpha 4 integrin (CD49d), a ~150 kDa single pass type I membrane glycoprotein that can associate with either beta 1 integrin (CD29) or beta 7 integrin to form heterodimers CD49d/CD29 (VLA-4) and alpha4/beta7 (LPAM-1) respectively (Holzmann <i>et al.</i> 1989). CD49d is expressed on most lymphocytes, granulocytes, monocytes and thymocytes. Th primary ligands for CD49d are CD106 (VCAM-1), fibronectin and MAdCAM-1 (Sheppard <i>et al.</i> 1994).	ıe
	Clone PS/2 has also been reported to block the binding of CD49d to its ligands (<u>Andrew</u> <u>et al. 1994</u>).	
Flow Cytometry	Use 10µl of the suggested working dilution to label 10 ⁶ cells in 100µl. The Fc region of monoclonal antibodies may bind to cells expressing low affinity Fc receptors. This may be reduced by using SeroBlock FcR (<u>BUF041A/BUF041B</u>).

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at
	-20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for
	short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee 12 months from date of despatch

Acknowledgements The Alexa Fluor dye antibody conjugates in this product are sold under license from Molecular Probes, Inc. for research use only, except for use in combination with

microarrays, and are covered by pending and issued patents.
