

Datasheet: MCA1267SBUV575

Description:	MOUSE ANTI HUMAN CD4:StarBright UltraViolet 575
Specificity:	CD4
Format:	StarBright UltraViolet 575
Product Type:	Monoclonal Antibody
Clone:	RPA-T4
Isotype:	lgG1
Quantity:	100 TESTS/0.5ml

### **Product Details**

# **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	<b>Suggested Dilution</b>
Flow Cytometry	-			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human		
Product Form	Purified IgG conjugate	ed to StarBright UltraV	iolet 575 - liquid
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm
	StarBright UltraViolet 575	340	569
Preparation	Purified IgG prepared supernatant	by affinity chromatog	raphy on Protein G
<b>Buffer Solution</b>	Phosphate buffered sa	aline	
Buffer Solution Preservative	Phosphate buffered so		
	·	(NaN <sub>3</sub> )	
Preservative	0.09% sodium azide (	(NaN <sub>3</sub> )	
Preservative	0.09% sodium azide ( 1% bovine serum albu	(NaN <sub>3</sub> )

# **Specificity**

Mouse anti human CD4 antibody, clone RPA-T4 recognizes human CD4, a ~55 kDa cell surface glycoprotein, primarily expressed on a subpopulation of T lymphocytes, on peripheral blood monocytes and on tissue macrophages. Epitope mapping shows that antibodies, produced by clone RPA-T4, recognize an epitope within domain 1 of the extracellular region of the CD4 molecule.

Mouse anti human CD4 antibody, clone RPA-T4 blocks gp120-CD4 interaction and inhibits syncytium formation (<u>Piatier-Tonneau et al, 1997</u>). The use of <u>Mouse anti Human CD4:Low Endotoxin (**MCA1267EL**)</u> is recommended for functional assays.

### Flow Cytometry

Use 5µl of the suggested working dilution to label 10<sup>6</sup> cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
