

## Datasheet: MCA1267SBUV605T

**BATCH NUMBER 64718177**

|                      |   |
|----------------------|---|
| <b>Description:</b>  | MOUSE ANTI HUMAN CD4:StarBright UltraViolet 605 |
| <b>Specificity:</b>  | CD4   |
| <b>Format:</b>       | StarBright UltraViolet 605                      |
| <b>Product Type:</b> | Monoclonal Antibody                             |
| <b>Clone:</b>        | RPA-T4  |
| <b>Isotype:</b>      | IgG1  |
| <b>Quantity:</b>     | 25 TESTS/0.125ml                                |

### Product Details

#### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|                | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | ▪   |    |                | Neat               |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

|                        |   |                            |                          |
|------------------------|---|----------------------------|--------------------------|
| <b>Target Species</b>  | Human   |                            |                          |
| <b>Product Form</b>    | Purified IgG conjugated to StarBright UltraViolet 605 - liquid                                |                            |                          |
| <b>Max Ex/Em</b>       | <b>Fluorophore</b>  | <b>Excitation Max (nm)</b> | <b>Emission Max (nm)</b> |
|                        | StarBright UltraViolet 605  | 340                        | 609                      |
| <b>Preparation</b>     | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant |                            |                          |
| <b>Buffer Solution</b> | Phosphate buffered saline   |                            |                          |
| <b>Preservative</b>    | 0.09% Sodium Azide (NaN <sub>3</sub> )  |                            |                          |
| <b>Stabilisers</b>     | 1% Bovine Serum Albumin   |                            |                          |
|                        | 0.1% Pluronic F68   |                            |                          |
|                        | 0.1% PEG 3350   |                            |                          |

0.05% Tween 20

|------------------------|--|
| <b>Fusion Partners</b> | Spleen cells from immunized BALB/c mice were fused with cells of the mouse NSI myeloma cell line |
|------------------------|--|

---

|                    |   |
|--------------------|---|
| <b>Specificity</b> | <p><b>Mouse anti human CD4 antibody, clone RPA-T4</b> recognizes human CD4, a ~55 kDa cell surface glycoprotein, primarily expressed on a subpopulation of T lymphocytes, on peripheral blood monocytes and on tissue macrophages. Epitope mapping shows that antibodies, produced by clone RPA-T4, recognize an epitope within domain 1 of the extracellular region of the CD4 molecule.</p> <p>Mouse anti human CD4 antibody, clone RPA-T4 blocks gp120-CD4 interaction and inhibits syncytium formation (<a href="#">Piatier-Tonneau et al, 1997</a>).</p> |
|--------------------|---|

---

|                       |   |
|-----------------------|---|
| <b>Flow Cytometry</b> | Use 5µl of the suggested working dilution to label 10 <sup>6</sup> cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application. |
|-----------------------|---|
