

Datasheet: MCA1322F BATCH NUMBER 1709

Description:	RAT ANTI MOUSE CD204:FITC
Specificity:	CD204
Other names:	SCAVENGER RECEPTOR TYPE I/II
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	2F8
Isotype:	lgG2b
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .					
		Yes No	Not Determined	Suggested Dilution		
	Flow Cytometry	•		Neat		
	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.					
Target Species	Mouse					
Species Cross	Reacts with: Pig, Char	nel catfish				
Reactivity	N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.					
Product Form	Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid					
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)			
	FITC	490	525			
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant					

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum Albumin
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml
Immunogen	Raw 264 cell line
External Database Links	UniProt: <u>P30204</u> <u>Related reagents</u> Entrez Gene: <u>20288</u> Msr1 <u>Related reagents</u>
Synonyms	Scvr
RRID	AB_322712
Fusion Partners	Spleen cells from immunised AO rats were fused with cells of the Y3 rat myeloma cell line
Specificity	Rat anti Mouse CD204 antibody, clone 2F8 recognizes the murine scavenger receptor class A (SR-A), type I and II, also known as CD204. CD204 is expressed by tissue macrophages and functions both as an endocytic receptor for lipoproteins and as an adhesion receptor for macrophages binding to ligand rich tissues e.g. atherosclerotic lesions. Rat anti Mouse CD204 antibody, clone 2F8 inhibits the uptake of acetylated low-density lipoproteins and also inhibits divalent cation independent adhesion (Fraser <i>et al.</i> 1993).
	polymorphic in the SRA from C57BL/6 mice. Rat anti Mouse CD204 antibody, clone 2F8 is therefore unsuitable for use with the C57BL/6 mouse strain (<u>Daugherty <i>et al.</i> 2000</u>).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul.
	The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors. This may be reduced by using SeroBlock FcR (<u>BUF041A/B</u>).
