<b>Specificity</b>	<p><b>Mouse anti Chicken CD3, clone CT-3</b> recognizes the chicken CD3 cell surface antigen expressed by T cells (<a href="#">Chen et al. 1986</a>). The antibody also co-precipitates a ~90 kDa heterodimer from digitonin solubilised T cell lysates, which can be reduced to two polypeptides of ~40 kDa and ~50 kDa.</p> <p>In the chicken, CD3 is expressed by approximately 30% of thymocytes, 70% of peripheral blood mononuclear cells, but &lt;1% of cells in the bursa and bone marrow.</p>
<b>Flow Cytometry</b>	Use 50ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.
