

Datasheet: MCA1538

Description:	MOUSE ANTI HUMAN THIOREDOXIN
Specificity:	THIOREDOXIN
Other names:	TXN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	2B1
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen	▪			
Immunohistology - Paraffin	▪			
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			10ug/ml - 50ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Marmoset

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers	<0.1% sodium azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Recombinant human thioredoxin.
External Database Links	<p>UniProt: P10599 Related reagents</p> <p>Entrez Gene: 7295 TXN Related reagents</p>
Synonyms	TRDX, TRX, TRX1
RRID	AB_2212137
Specificity	<p>Mouse anti Human thioredoxin antibody, clone 2B1 recognizes human thioredoxin, also known as ATL-derived factor or Surface-associated sulphhydryl protein. Thioredoxin is a 105 amino acid ~12kDa dithiol oxidoreductase with powerful protein disulphide oxidoreductase activity containing a single thioredoxin domain (UniProt: P10599).</p> <p>Thioredoxin is involved in a number of cellular processes, including activation of the transcription factor NF-KB (Kelleher et al. 2014). Thioredoxin is highly expressed in the glandular cells of the GI tract and uterine tissues, also activated B and T-cells (Rubartelli et al. 1992).</p> <p>Mouse anti Human thioredoxin antibody, clone 2B1 has been used successfully in a biotinylated format as a detection reagent in a thioredoxin sandwich ELISA as part of a study looking at thioredoxin levels in placental trophoblast cells (Di Trapani et al. 1998), a study which also used the antibody for immunoprecipitation of thioredoxin as well as detection of thioredoxin by western blotting.</p> <p>Mouse anti Human thioredoxin antibody, clone 2B1 is also useful for the demonstration of thioredoxin expression on formalin fixed, paraffin embedded material by immunohistochemistry (Lincoln et al. 2003). Clone 2B1 has also been used as a capture reagent in a sandwich ELISA for thioredoxin (Perking et al. 1995).</p>

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
