

## Datasheet: MCA1556A488

Description:	MOUSE ANTI HUMAN CD10:Alexa Fluor® 488			
Specificity:	CD10			
Other names:	CALLA			
Format:	ALEXA FLUOR® 488			
Product Type:	Monoclonal Antibody			
Clone:	SN5c			
Isotype:	lgG1			
Quantity:	100 TESTS/1ml			

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .				
		Yes N	0	Not Determined	Suggested Dilution
	Flow Cytometry	•			Neat - 1/10
	Where this product ha	s not been teste	d for us	se in a particular tech	nnique this does not
	necessarily exclude its use in such procedures. Suggested working dilutions are given a a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.				
Target Species	Human				
Product Form	Purified IgG conjugated to Alexa Fluor® 488 - liquid				
Max Ex/Em	Fluorophore	Excitation Max	nm) l	Emission Max (nm)	
	Alexa Fluor®488	495		519	
Preparation	Purified IgG prepared supernatant	by affinity chrom	atogra	phy on Protein A fror	m tissue culture
Buffer Solution	Phosphate buffered saline				
Preservative	0.09% sodium azide (NaN <sub>3</sub> )				
Stabilisers	1% bovine serum albumin				
Approx. Protein Concentrations	IgG concentration 0.05	5 mg/ml

	<u>4311</u> MME <u>Related reagents</u>
Synonyms	EPN
RRID	AB_324841
Fusion Partners	Spleen cells from immunized BALB/c mice were fused with cells of the mouse PS/NS1 /1-Ag4-1 myeloma cell line
Specificity	Mouse anti Human CD10 antibody, clone SN5c recognizes human neprilysin, also known as CD10, atriopeptidase, enkephalinase, neutral endopeptidase 24.11, skin fibroblast elastase or common acute lymphocytic leukemia antigen (CALLA). CD10 is a 749 aminoacid, ~100 kDa single pass type II transmembrane glycoprotein expressed by acute lymphoblastic leukaemia cells and by peripheral blood granulocytes. Defects in the MME gene encoding CD10 can lead to the development of the peripheral nervous system disorder, Charcot-Marie-Tooth disease 2T (CMY2T), an axonal form of
	Marie-Charcot-Tooth disease characterized by either dominantly inherited primary peripheral demyelinating neuropathies, designated CMT1, or primary peripheral axonal neuropathies showing axonal degeneration in the absence of any obvious myelin alteration (CMT2).
Flow Cytometry	Use $10\mu$ I of the suggested working dilution to label $10^6$ cells in $100\mu$ I

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.				
	Avoid repeated freezing and thawing as this may denature the frost-free freezers is not recommended. This product is photose protected from light.				
Guarantee	12 months from date of despatch				
Acknowledgements	This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research. For information on purchasing a license to this product for purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad CA 92008 USA or outlicensing@thermofisher.com
