

Datasheet: MCA1615T

#### **BATCH NUMBER 1608**

Description:	MOUSE ANTI HUMAN CD54	
Specificity:	CD54	
Other names:	ICAM-1	
Format:	Purified	
Product Type:	Monoclonal Antibody	
Clone:	15.2	
Isotype:	lgG1	
Quantity:	20 µg	

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			1/50 - 1/100
Immunohistology - Frozen	•			1/50 - 1/100
Immunohistology - Paraffin				

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Human
Species Cross Reactivity	Reacts with: Pig  N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	0.09% Sodium Azide	
Carrier Free	Yes	
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml	
Immunogen	Human monocytes	
External Database Links	UniProt:  P05362 Related reagents  Entrez Gene:  3383 ICAM1 Related reagents	
RRID	AB_324646	
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with ce Sp2/O-Ag14 myeloma cell line	ells of the mouse
Specificity	Mouse anti Human CD54 antibody, clone 15.2 recognizes to antigen also known as intracellular Adhesion Molecule -1 (ICA rhinovirus receptor.	
	CD54 is expressed by many cells following activation by inflar 505 amino acid with an additional 27 amino acid signal peptid transmembrane glycoprotein bearing 5 lg-like C2-type domain	e ~90 kDa single pass type I
	Mouse anti Human CD54 antibody, clone 15.2 blocks CD54 fu Mouse anti Human CD54 antibody, clone 15.2 binds to an epi Ig-like domain within a region designated the L43 loop ( <u>Chakr</u>	tope on the N-terminal
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in	n 100ul.
Histology Positive Control Tissue	Human Tonsil

#### Storage

Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

#### Guarantee

18 months from date of despatch.
