Datasheet: MCA1642T

**Description:** RAT ANTI HUMAN CD52

**Specificity:** CD52

**Other names:** CAMPATH-1

**Format:** Purified

**Product Type:** Monoclonal Antibody

**Clone:** YTH34.5

**Isotype:** IgG2b

**Quantity:** 20 µg

### Product Details

**RRID** AB_324303

**Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**Target Species**  Human

**Species Cross Reactivity**  Reacts with: Rhesus Monkey

**N.B.** Antibody reactivity and working conditions may vary between species.

**Product Form**  Purified IgG - liquid

**Preparation**  Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

**Buffer Solution**  Phosphate buffered saline

**Preservative Stabilisers**  0.09% Sodium Azide

**Approx. Protein Concentrations**  IgG concentration 1.0 mg/ml

**Immunogen**  Human lymphocytes.
Rat anti Human CD52 antibody, clone YTH34.5 reacts with the human CD52 antigen, also known as CAMPATH-1. The CD52 antigen is a remarkably small but heavily glycosylated peptide attached to the cell surface membrane via a GPI link (Xia et al. 1991).

The apparent molecular mass of the native antigen on SDS-PAGE is 25-29kDa, considerably reduced following N-glycanase treatment (Rowan et al. 1998).

CD52 is expressed at high density by lymphocytes, monocytes, eosinophils, thymocytes and macrophages. It is expressed by most lymphoid derived malignancies, although expression on myeloma cells is variable.

Humanized versions of CAMPATH-1 specific antibodies are currently in clinical trials for the treatment of a range of lymphoid malignancies (Dearden et al. 2002; Pettitt et al. 2012).

Flow Cytometry
Use 10ul of the suggested working dilution to label 1 x 10^6 cells in 100ul.

Histology Positive Control Tissue
Tonsil

References

**Storage**

Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

**Guarantee**

18 months from date of despatch.

**Health And Safety Information**

**Regulatory**

For research purposes only
