Specificity	Mouse anti Bovine CD45RB, clone CC76 , recognizes the RB isoform of the bovine leucocyte common antigen expressed on subpopulations of CD4+ and CD8+ T cells. Expression levels of CD45RB are used as a marker for differentiating naïve and memory T lymphocytes (Howard <i>et al.</i> 1991). The antigen recognized by clone CC76 is also expressed on B cells but is absent from both macrophages and granulocytes.
Flow Cytometry	Use 10µl of the suggested working dilution to label 10 ⁶ cells in 100µl
