Datasheet: MCA1653A647

**Description:** MOUSE ANTI BOVINE CD4: Alexa Fluor® 647

**Specificity:** CD4

**Format:** ALEXA FLUOR® 647

**Product Type:** Monoclonal Antibody

**Clone:** CC8

**Isotype:** IgG2a

**Quantity:** 100 TESTS/1ml

### Product Details

**RRID** AB_2077621

**Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**Target Species** Bovine

**Product Form** Purified IgG conjugated to Alexa Fluor® 647 - liquid

**Max Ex/Em**

**Preparation** Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

**Buffer Solution** Phosphate buffered saline

**Preservative Stabilisers**

- 0.09% Sodium Azide
- 1% Bovine Serum Albumin

**Approx. Protein Concentrations** IgG concentration 0.05 mg/ml

**Immunogen** Bovine lymphocytes.

Fusion Partners

Spleen cells from an immunized mouse were fused with cells of the mouse NS1 myeloma cell line.

Specificity

Mouse anti Bovine CD4 antibody, clone CC8 recognizes bovine CD4, the homolog of human CD4 and immunoprecipitates a ~50 kDa molecule. The phenotype, tissue distribution and function of T-cells expressing the bovine CD4 antigen are similar to those in other species. However, expression on macrophages has not yet been detected. Clone CC8 has been reported as being suitable for use on formalin dichromate (FD5) fixed paraffin embedded tissue with amplification and antigen retrieval techniques (Eskra et al. 1991).

Flow Cytometry

Use 10ul of the suggested working dilution to label $10^6$ cells in 100ul.

Storage
Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost free freezers is not recommended. This product is photosensitive and should be protected from light.

Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee
18 months from date of despatch.
