

Datasheet: MCA1710F BATCH NUMBER 163711

Description:	MOUSE ANTI HUMAN CD20:FITC
Specificity:	CD20
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	2H7
Isotype:	lgG2b
Quantity:	0.1 mg

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			Neat - 1/10
Immunofluorescence			•	

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Human				
Reacts with: Rhe	sus Monkey			
<b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated fo further information.				
Purified IgG conju	ugated to Fluorescein isoth	niocyanate isomer 1	(FITC) - liquid.	
Fluorophore	Excitation Max (nm)	Emission Max (nm	)	
FITC	490	525		
Purified IgG prepared	ared by affinity chromatog	raphy on Protein A	from tissue culture

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum Albumin
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml
External Database Links	UniProt: P11836 Related reagents  Entrez Gene: 931 MS4A1 Related reagents
Synonyms	CD20
RRID	AB_322660
Specificity	<b>Mouse anti Human CD20 antibody, clone 2H7</b> recognizes the human CD20 cell surface antigen, a 33-37 kDa non-glycosylated phosphoprotein.
	The CD20 antigen is expressed during pre-B-cell development. It is present on both resting and activated B-cells but is lost prior to terminal B-cell differentiation into plasma cells.
	The epitope recognized by clone 2H7 has been mapped to the following sequence found in the large extracellular loop of human CD20: YNCEPANPSEKNSPST. Furthermore it appears that Mouse anti Human CD20 antibody, clone 2H7 only recognizes human CD20 in its native oligomeric form (Polyak et al. 2002).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells or 100ul whole blood

## Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee	12 months from date of despatch
