

Datasheet: MCA1710PB

Description:	MOUSE ANTI HUMAN CD20:Pacific Blue®		
Specificity:	CD20		
Format:	Pacific Blue®		
Product Type:	Monoclonal Antibody		
Clone:	2H7		
Isotype:	lgG2b		
Quantity:	100 TESTS/1ml		

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			Neat - 1/5
Immunofluorescence			•	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human			
Species Cross	Reacts with: Rhes	•		
Reactivity	reactivity is derive	ctivity and working conditi d from testing within our li ications from the originaton.	aboratories, peer-reviev	wed publications or
Product Form	Purified IgG conjugated to Pacific Blue® - liquid.			
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)	
	Pacific Blue®	410	455	
Preparation	Purified IgG prepa	ared by affinity chromatog	raphy on Protein A from	n tissue culture
Buffer Solution	Phosphate buffere			

Preservative Stabilisers	0.09% sodium azide (NaN ₃) 1% bovine serum albumin			
Approx. Protein Concentrations	IgG concentration 0.05 mg/ml			
External Database Links	UniProt: P11836 Related reagents Entrez Gene: 931 MS4A1 Related reagents			
Synonyms	CD20			
RRID	AB_566609			
Specificity	Mouse anti Human CD20 antibody, clone 2H7 recognizes the human CD20 cell surface antigen, a 33-37 kDa non-glycosylated phosphoprotein.			
	The CD20 antigen is expressed during pre-B-cell development. It is present on both resting and activated B-cells but is lost prior to terminal B-cell differentiation into plasma cells.			
	The epitope recognized by clone 2H7 has been mapped to the following sequence found in the large extracellular loop of human CD20: YNCEPANPSEKNSPST. Furthermore it appears that Mouse anti Human CD20 antibody, clone 2H7 only recognizes human CD20 in its native oligomeric form (Polyak et al. 2002).			
Flow Cytometry	Use 10µl of the suggested working dilution to label 1x 10 ⁶ cells in 100µl

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee

12 months from date of despatch

Acknowledgements

This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchased product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research. For information on purchasing a license to this product for purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad CA 92008 USA or outlicensing@thermofisher.com
