

Datasheet: MCA1710PE

### **BATCH NUMBER 151274**

Description:	MOUSE ANTI HUMAN CD20:RPE	
Specificity:	CD20	
Format:	RPE	
Product Type:	Monoclonal Antibody	
Clone:	2H7	
Isotype:	lgG2b	
Quantity:	100 TESTS	

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	-			Neat

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Human

	Tartifer information.				
Product Form	Purified IgG conjuga	ated to R. Phycoerythrin	(RPE) - lyophilized		
Reconstitution	Reconstitute with 1	ml distilled water			
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)		
	RPE 488nm laser	496	578		
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture				
	supernatant				

Buffer Solution	Phosphate buffered saline		
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum Albumin 5% Sucrose		
External Database Links	UniProt: P11836 Related reagents		
	Entrez Gene:  931 MS4A1 Related reagents		
Synonyms	CD20		
RRID	AB_322661		
Specificity	Mouse anti Human CD20 antibody, clone 2H7 recognizes the human CD20 cell surfactantigen, a 33-37 kDa non-glycosylated phosphoprotein.		
	The CD20 antigen is expressed during pre-B-cell development. It is present on both resting and activated B-cells but is lost prior to terminal B-cell differentiation into plasma cells.		
	The epitope recognized by clone 2H7 has been mapped to the following sequence found in the large extracellular loop of human CD20: YNCEPANPSEKNSPST. Furthermore it appears that Mouse anti Human CD20 antibody, clone 2H7 only recognizes human CD20 in its native oligomeric form (Polyak et al. 2002).		
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells or cells or 100ul whole blood.

Prior to reconstitution store at +4°C.

After reconstitution store at +4°C.

DO NOT FREEZE. This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee	12 months from date of despatch
