

Datasheet: MCA1710SBY720

# **BATCH NUMBER 100007334**

Description:	MOUSE ANTI HUMAN CD20:StarBright Yellow 720
Specificity:	CD20
Format:	StarBright Yellow 720
Product Type:	Monoclonal Antibody
Clone:	2H7
Isotype:	lgG2b
Quantity:	100 TESTS/0.5ml

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human			
Species Cross	Reacts with: Rhesus	Monkey		
Reactivity	reactivity is derived fr	ity and working condition testing within our litions from the originate	aboratories, peer-revie	ewed publications o
Product Form		ed to StarBright Yellov	<i>1</i> 720 - liquid	
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)	
	StarBright Yellow 720	548	719	
Preparation	Purified IgG prepared supernatant	l by affinity chromatog	raphy on Protein G fro	m tissue culture
Buffer Solution	Phosphate buffered s	aline		

# Preservative Stabilisers

0.09% Sodium Azide (NaN<sub>3</sub>)1% Bovine Serum Albumin

0.1% Pluronic F680.1% PEG 33500.05% Tween 20

## **Synonyms**

CD20

#### **Specificity**

**Mouse anti Human CD20 antibody, clone 2H7** recognizes the human CD20 cell surface antigen, a 33-37 kDa non-glycosylated phosphoprotein.

The CD20 antigen is expressed during pre-B-cell development. It is present on both resting and activated B-cells but is lost prior to terminal B-cell differentiation into plasma cells.

The epitope recognized by clone 2H7 has been mapped to the following sequence found in the large extracellular loop of human CD20: YNCEPANPSEKNSPST. Furthermore it appears that Mouse anti Human CD20 antibody, clone 2H7 only recognizes human CD20 in its native oligomeric form (Polyak et al. 2002).

#### **Flow Cytometry**

Use  $5\mu$ I of the suggested working dilution to label  $10^6$  cells in  $100\mu$ I. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
