

## Datasheet: MCA1729

**BATCH NUMBER 157146**

<b>Description:</b>	MOUSE ANTI HUMAN CD44v5
<b>Specificity:</b>	CD44v5
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	VFF-8
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			1/10
Immunohistology - Frozen	▪			1/10
Immunohistology - Paraffin (1)	▪			1/10
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.**

<b>Target Species</b>	Human
<b>Product Form</b>	Purified IgG - liquid
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide
<b>Approx. Protein</b>	IgG concentration 0.1 mg/ml

### Specificity

**Mouse anti Human CD44v5 antibody, clone VFF-8** specifically recognises an epitope encoded by exon v5 on the variant region of human CD44. CD44 is a type I transmembrane glycoprotein of variable molecular weight ranging from ~90 kDa to ~220 kDa depending on alternate splicing of the variable region exons and on the degree of glycosylation. CD44 is expressed on multiple cell types and is involved in multiple functions including cell-cell interactions and cell-extracellular matrix binding. Hyaluronan, a high molecular weight polysaccharide component of the extracellular matrix acts as the principal ligand for the CD44 receptor ([Laurent and Fraser 1992](#)).

CD44 isoforms containing one or more sequences encoded by the variant region exons have a much more restricted expression pattern both in terms of organ specificity and immune activation ([Mackay et al. 1994](#)). CD44 isoforms bearing the v5 exon product have been implicated in various neoplasms including breast cancer ([Tempfer et al. 1996](#)), renal cell carcinoma ([Wu et al. 2003](#)) and cervical cancer metastases ([Kainz et al. 1996](#)).

Mouse anti Human CD44v5 antibody has proved a useful reagent for the immunohistochemical or flow cytometric evaluation of CD44 variants containing the v5 exon product expression in normal and neoplastic cells ([Ringel et al. 2001](#))

---

### Flow Cytometry

Use 10ul of the suggested working dilution to label  $10^6$  cells in 100ul.

---

<b>Storage</b>	Store at +4°C or at -20°C if preferred.  This product should be stored undiluted.  Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
