

Datasheet: MCA1736SBV610

| Description: | MOUSE ANTI PIG CD25:StarBright Violet 610 |
|---------------|---|
| Specificity: | CD25 |
| Other names: | IL-2R ALPHA CHAIN |
| Format: | StarBright Violet 610 |
| Product Type: | Monoclonal Antibody |
| Clone: | K231.3B2 |
| Isotype: | IgG1 |
| Quantity: | 100 TESTS/0.5ml |
| | |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | | Neat |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| Target Species | Pig | | | |

| RRID | AB_2943386 |
| Fusion Partners | Spleen cells from immunized mice were fused with cells of the mouse P3-X63-Ag.8.653 myeloma cell line. |
| Specificity | Mouse anti Pig CD25, clone K231.3B2 recognizes porcine CD25, the alpha chain of the interleukin 2 receptor (IL-2R α), also known as the low affinity Interleukin 2 receptor. The IL-2 receptor exists in three forms, the high affinity heterodimer, the intermediate affinity β monomer and the low affinity α monomer configurations. Clone K231.3B2 was clustered as CD25 at the First International Workshop to Define Swine Cluster of Differentiation (CD) Antigens (Lunney <i>et al.</i> 1994). |
| | Mouse anti pig CD25, clone K231.3B2 immunoprecipitates a protein of ~65-70 kDa from activated lymphocyte preparations (<u>Bailey et al. 1992</u>). |
| | CD25 is a 270 amino acid single pass type I transmembrane glycoprotein containing 2 Sushi domains. Low expression of CD25 is seen on resting peripheral blood mononuclear cells, rapidly up-regulated following stimulation by concanavalin A and phorbol myristate acetate, indicative of its role as an activation antigen (<u>Bullido et al. 1999</u>). |
| Flow Cytometry | Use 5µl of the suggested working dilution to label 10 ⁶ cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application. |
