

Datasheet: MCA1738PET

BATCH NUMBER INN1610

| Description: | MOUSE ANTI HUMAN CD31:RPE |
|----------------------|---------------------------|
| Specificity: | CD31 |
| Other names: | PECAM-1 |
| Format: | RPE |
| Product Type: | Monoclonal Antibody |
| Clone: | WM59 |
| Isotype: | lgG1 |
| Quantity: | 25 TESTS |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | - | | | Neat |

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

| Human |
|--|
| Reacts with: Cynomolgus monkey, Rhesus Monkey |
| N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. |
| |

| Product Form | Purified IgG conjuga | Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized | | |
|----------------|--|---|-------------------|--|
| Reconstitution | Reconstitute with 0.25ml distilled water | | | |
| Max Ex/Em | Fluorophore | Excitation Max (nm) | Emission Max (nm) | |
| | RPE 488nm laser | 496 | 578 | |

Preparation Purified IgG prepared by affinity chromatography on Protein G from tissue culture

supernatant

| Specificity | Mouse anti Human CD31 monoclonal antibody, clone WM59 recognizes the human CD31 antigen, a ~130 kDa single pass type I transmembrane glycoprotein bearing six C2 immunoglobulin domains. CD31 is expressed by all continuous endothelia including arteries, veins and non-sinusoidal capillaries, platelets,granulocytes and some lymphocytes. CD31 is not expressed by discontinuous endothelia such as hepatic sinusoids and splenic red pulp (Muller et al. 1989).CD31 is also known as PECAM-1. |
| | The binding epitope for mouse anti human CD31, clone WM59 has been mapped to the Ig-like domain 2 (<u>Fawcett <i>et al.</i> 1995</u>). |
| Flow Cytometry | Use 10ul of the suggested working dilution to label 10 ⁶ cells or 100ul whole blood |
