

Datasheet: MCA1752 BATCH NUMBER 1601

Description:	MOUSE ANTI PIG ENDOTHELIAL CELLS
Specificity:	ENDOTHELIAL CELLS
Format:	S/N
Product Type:	Monoclonal Antibody
Clone:	MIL11
Isotype:	IgE
Quantity:	2 ml

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .								
		Yes	No	Not Determined	Suggested Dilution				
	Flow Cytometry			•					
	Immunohistology - Frozen	-			1/20 - 1/100				
	Immunohistology - Paraffin			•					
	ELISA			•					
	Immunoprecipitation	nunoprecipitation							
	Western Blotting			•					
Target Species	necessarily exclude its us a guide only. It is recomn system using appropriate Pig	nended th	at the use	er titrates the antibody	• •				
Product Form	Tissue Culture Supernata	Tissue Culture Supernatant - liquid							
Buffer Solution	Phosphate buffered salin	Phosphate buffered saline							
Preservative Stabilisers	0.09% Sodium Azide								
Immunogen	Plastic adherent porcine	nphocytes.							
RRID	AB_322717								

Specificity	Mouse anti Pig endothelial cells, clone MIL11 raised initially against an immunogen of plastic adherent lymphocytes has been shown to recognize a major subset of porcine endothelial cells. MIL11 was initially identified as staining a characteristic pattern of capillary endothelium in gut forming a network in the lamina propria below the epithelial membrane. Staining was subsequently observed in capillary endothelium in most organs examined, including gut, lung, kidney and skin. Clone MIL11 was observed not to stain endothelium of aorta and other arteries whereas venous endothelium was positive for MIL11 staining. Some population of venous endothelial cells however appear negative for MIL11 staining including those associated with the heart wall, kidney glomeruli and corpus cavernosum (Wilson <i>et al.</i> 1996).

Storage	Store at +4°C or at -20°C if preferred. This product should be stored undiluted. Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	18 months from date of despatch.
Health And Safety Information	Material Safety Datasheet documentation #10053 available at: https://www.bio-rad-antibodies.com/SDS/MCA1752 10053
