

Datasheet: MCA1768A647

Description:	RAT ANTI MOUSE CD8:Alexa Fluor® 647			
Specificity:	CD8			
Format:	ALEXA FLUOR® 647			
Product Type:	Monoclonal Antibody			
Clone:	YTS169.4			
Isotype:	lgG2b			
Quantity:	100 TESTS/1ml			

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				Neat - 1/5

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Mouse					
Product Form	Purified IgG conjug					
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm	1)		
	Alexa Fluor®647	650	665			
Preparation	Purified IgG prepar supernatant	red by affinity chromatog	raphy on Protein G	from tissue culture		
Buffer Solution	Phosphate buffered saline					
Preservative	0.09% sodium azide (NaN ₃)					
Stabilisers	1% bovine serum a	albumin				
Approx. Protein Concentrations	IgG concentration (0.05 mg/ml

Specificity

Rat anti Mouse CD8 antibody, clone YTS169.4 recognizes the murine CD8 cell surface antigen, expressed by a subset of T lymphocytes.

Rat anti Mouse CD8 antibody, clone YTS169.4 exhibits depleting activity when used *in vivo*.

Flow Cytometry

Use 10μ I of the suggested working dilution to label 10^6 cells in 100μ I. The Fc region of monoclonal antibodies may bind to cells expressing low affinity fc

receptors. This may be reduced by using SeroBlock FcR (BUF041A/BUF041B).

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee

12 months from date of despatch

Acknowledgements

This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research. For information on purchasing a license to this product for purposes other than as described above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad CA 92008 USA or outlicensing@thermofisher.com
