Datasheet: MCA1778S

BATCH NUMBER 171471

Description:	MOUSE ANTI DOG CD11c
Specificity:	CD11c
Other names:	CD11, INTEGRIN ALPHA X CHAIN
Format:	S/N
Product Type:	Monoclonal Antibody
Clone:	CA11.6A1
Isotype:	IgG1
Quantity:	2 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen (1)	▪			
Immunohistology - Paraffin		▪		
ELISA			▪	
Immunoprecipitation	▪			
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)**The epitope recognised by this antibody is reported to be sensitive to formaldehyde fixation and tissue processing. Bio-Rad recommends the use of acetone fixation for frozen sections.**

Target Species

Dog

Species Cross Reactivity

Reacts with: Hooded Seal, Raccoon

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form	Tissue culture supernatant - liquid
Preservative Stabilisers	<0.1% Sodium Azide (NaN_3)
RRID	AB_322942
Specificity	**Mouse anti Dog CD11c antibody, clone CA11.6A1** recognizes the canine CD11c cell surface antigen, a member of the alpha integrin family. Canine CD11c is expressed by monocytes, granulocytes and by dendritic cells. Mouse anti Dog CD11c, clone CA11.6A1 immunoprecipitates proteins of approximately 95 kDa, corresponding to the common β chain of the CD11/CD18 heterodimer and ~150 kDa, the CD11c; chain from canine leukocyte preparations (Danilenko *et al.* 1992)
Flow Cytometry	Use 10µl of the suggested working dilution to label 10^6 cells or 100µl whole blood

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10336 available at: https://www.bio-rad-antibodies.com/SDS/MCA1778S
