

Datasheet: MCA1841

Description:	MOUSE ANTI HUMAN CD117
Specificity:	CD117
Other names:	C-KIT, SCF-R
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	104D2
Isotype:	lgG1
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is
	derived from testing within our laboratories, peer-reviewed publications or personal
	communications from the originators. Please refer to references indicated for further
	information. For general protocol recommendations, please visit www.bio-
	rad-antibodies.com/protocols.

		Yes	No	Not Determined	Suggested Dilution	
	Flow Cytometry	-			1/2 - 1/20	
	Immunohistology - Frozen			•		
	Immunohistology - Paraffin			•		
	ELISA			•		
	Immunoprecipitation			•		
	Western Blotting			•		
	Where this product has r	not been t	ested for	use in a particular tech	nique this does not	
	a guide only. It is recomm	ssarily exclude its use in such procedures. Suggested working dilutions are given as de only. It is recommended that the user titrates the product for use in their own m using appropriate negative/positive controls.				
Target Species	Human					
Species Cross Reactivity	Reacts with: Cynomolgus monkey, Bovine N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.					
Product Form	Purified IgG - liquid					
Preparation	Purified IgG prepared by	affinity cl	nromatog	raphy		

 surface antigen, a 145 kDa glycoprotein also known as c-kit. CD117 is expressed by s haematopoietic stem cells (approx. 70% of CD34+ve cells in normal bone marrow are CD117+ve), some acute myeloid leukaemias and by mast cells. Functionally CD117 is a receptor for stem cell factor, and has receptor tyrosine kinase activity. Mouse anti Human CD117 antibody, clone 104D2 is non-neutralizing. Flow Cytometry Use 10µl of the suggested working dilution to label 10⁶ cells in 100µl. References 1. Broudy, V.C. <i>et al.</i> (1998) Analysis of c-kit receptor dimerization by fluorescence resonance energy transfer. Blood. 91 (3): 898-906. 2. StorageThis product is shipped at ambient temperature. It is recommended to aliquot and stor -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C short term use (up to 4 weeks) and store the remaining aliquots at -20°C.Avoid repeated freezing and thawing as this may denature the antibody.
