

# Datasheet: MCA1855F

Description:	MOUSE ANTI HUMAN CD161:FITC			
Specificity:	CD161			
Other names:	NKR-P1			
Format:	FITC			
Product Type:	Monoclonal Antibody			
Clone:	B199.2			
Isotype:	lgG1			
Quantity:	0.1 mg			

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry	•			Nt - 1/10		
	Where this product has not been tested for use in a particular technique this does not						
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Human						
Product Form	Purified IgG conjugate	d to Fluoresce	ein Isothi	ocyanate Isomer 1 (F	TTC) - liquid		
Max Ex/Em	Fluorophore	Excitation Ma	ax (nm)	Emission Max (nm)			
	FITC	490		525			
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant						
Buffer Solution	Phosphate buffered saline						
Preservative Stabilisers	0.09% sodium azide (NaN <sub>3</sub> ) 1% bovine serum albumin						
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml						

External Database Links	UniProt: <u>Q12918</u> Related reagents					
	Entrez Gene: <u>3820</u> KLRB1 <u>Related reagents</u>					
Synonyms	CLEC5B, NKRP1A					
RRID	AB_323303					
Fusion Partners	Partners Spleen cells from immunised BALB/c mice were fused with cells of the mouse P2X63.Ag8.653 myeloma cell line.					
Specificity	<b>Example 2</b> Mouse anti Human CD161 antibody, clone B199.2 recognizes the human Killer cell lectin-like receptor subfamily B member 1, also known as CD161, C-type lectin domain family 5 member B, HNKR-P1a, NKR-P1A or Natural killer cell surface protein P1A. CD161 is a 225 amino acid ~25 kDa predicted molecular mass, single pass type II transmembrane glycoprotein with a single <u>C-type lectin</u> domain. CD161 is expressed b almost all NK cells and a subset of CD3+ve T cells (Lanier 1994).					
	CD161, a member of the C-lectin is expressed as a disulphide bond-linked homodimeric cell surface protein, comprising two chains of ~40-44 kDa ( <u>Lanier <i>et al.</i> 1994</u> ). CD161 acts as a receptor for another c-type lectin, LLT1 with roles in the regulation of NK cell and T cell function ( <u>Aldemir <i>et al.</i> 2005</u> ).					
	Mouse anti Human CD161 antibody, clone B199.2 cross-competes with and recognizes a similar epitope to the DX1 monoclonal antibody ( <u>Lanier <i>et al.</i> 1994</u> ).					
Flow Cytometry	Use $10\mu$ I of the suggested working dilution to label $10^6$ cells in $100\mu$ I

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store a -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/MCA1855F 10041
