

# Datasheet: MCA1855PET

Description:	MOUSE ANTI HUMAN CD161:RPE
Specificity:	CD161
Other names:	NKR-P1
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	B199.2
lsotype:	lgG1
Quantity:	25 TESTS

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol							
	recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .							
	Flow Cytometry	Yes	No	Not Determined	Suggested Dilution Neat			
		Where this antibody has not been tested for use in a particular technique this does not necessarily						
	exclude its use in such procedures. Suggested working dilutions are given as a guide only. It recommended that the user titrates the antibody for use in their own system using appropriat negative/positive controls.							
Target Species	Human							
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized							
Reconstitution	Reconstitute in 0.25 ml disilled water							
Max Ex/Em	Fluorophore	Excitation Max	(nm) Emi	ssion Max (nm)				
	RPE 488nm laser	496		578				
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant							
Buffer Solution	Phosphate buffered saline							
Preservative	0.09% Sodium Azide							
Stabilisers	1% Bovine Serum Albumin							
	5% Sucrose							
Immunogen	Purified human NK cells cultured in IL-2 ( <u>Bennett <i>et al.</i> 1996</u> )							
External Database Links	UniProt: <u>Q12918</u> Rel	ated reagents						

	Entrez Gene: <u>3820</u> KLRB1 <u>Related reagents</u>			
Synonyms	CLEC5B, NKRP1A			
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse P2X63.Ag8.653 myeloma cell line.			
Specificity	<b>Mouse anti Human CD161 antibody, clone B199.2</b> recognizes the human Killer cell lectin-like receptor subfamily B member 1, also known as CD161, C-type lectin domain family 5 member B, HNKR-P1a, NKR-P1A or Natural killer cell surface protein P1A. CD161 is a 225 amino acid ~25 kDa predicted molecular mass, single pass type II transmembrane glycoprotein with a single <u>C-type lectin</u> domain. CD161 is expressed by almost all NK cells and a subset of CD3+ve T cells (Lanier 1994).			
	CD161, a member of the C-lectin is expressed as a disulphide bond-linked homodimeric cell surface protein, comprising two chains of ~40-44 kDa ( <u>Lanier <i>et al.</i> 1994</u> ). CD161 acts as a receptor for another c-type lectin, LLT1 with roles in the regulation of NK cell and T cell function ( <u>Aldemir <i>et al.</i> 2005</u> ).			
	Mouse anti Human CD161 antibody, clone B199.2 cross-competes with and recognizes a similar epitope to the DX1 monoclonal antibody ( <u>Lanier <i>et al.</i> 1994</u> ).			
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.

Storage	Prior to reconstitution store at +4°C. Following reconstitution store at +4°C.
	DO NOT FREEZE.
	This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.
Shelf Life	12 months from date of reconstitution.
Health And Safety Information	Material Safety Datasheet documentation #10075 available at: 10075: <u>https://www.bio-rad-antibodies.com/uploads/MSDS/10075.pdf</u>
Regulatory	For research purposes only
