

Datasheet: MCA1940A488

Description:	MOUSE ANTI HUMAN CD19:Alexa Fluor® 488				
Specificity:	CD19				
Format:	ALEXA FLUOR® 488				
Product Type:	Monoclonal Antibody				
Clone:	LT19				
Isotype:	lgG1				
Quantity:	100 TESTS/1ml				

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> rad-antibodies.com/protocols.					
		Yes N	0	Not Determined	Suggested Dilution	
	Flow Cytometry	•			Neat - 1/10	
	Where this product has not been tested for use in a particular technique this does not					
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.					
Target Species	Human					
Product Form	Purified IgG conjugated to Alexa Fluor® 488 - liquid					
Max Ex/Em	Fluorophore	Excitation Max (nm) E	mission Max (nm)		
	Alexa Fluor®488	495		519	-	
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant					
Buffer Solution	Phosphate buffered saline					
Preservative Stabilisers	0.09% sodium azide (NaN ₃) 1% bovine serum albumin					
Approx. Protein Concentrations	IgG concentration 0.05 mg/ml

Specificity	Mouse anti Human CD19 antibody, clone LT19 recognizes human CD19 also known as T-cell surface antigen Leu-12 or B-lymphocyte surface antigen B4. CD19 is a ~95 kDa type I single pass transmembrane glycoprotein expressed on follicular dendritic cells and B-cells during maturation but is lost on development into plasma cells (<u>de Rie <i>et al.</i> 1989</u>).				
	CD19 is the broadest lineage specific marker for B cells and functions as a B-cell co-receptor in conjunction with CD21 (<u>Bradbury <i>et al.</i> 1992</u>), CD9, CD81 and CD82 (<u>Horváth <i>et al.</i> 1998</u>). CD19 is implicated in the down-regulation of B cell growth and proliferation (<u>Pezzutto <i>et al.</i> 1987</u>).				
Flow Cytometry	Use 10µl of the suggested working dilution to label 1 x 10^6 cells in 100µl

Guarantee	12 months from date of despatch
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
