

Datasheet: MCA1940FT

BATCH NUMBER 156900

Description:	MOUSE ANTI HUMAN CD19:FITC
Specificity:	CD19
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	LT19
Isotype:	lgG1
Quantity:	25 μg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				Neat - 1/10

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Human		
Product Form	Purified IgG conjugate	ed to Fluorescein Isoth	niocyanate Isomer 1
/lax Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm
	FITC	490	525
reparation	Purified IgG prepared supernatant	by affinity chromatog	raphy on Protein A
fer Solution	Phosphate buffered s	aline	
ervative	0.09% Sodium Azide		
ıbilisers	1% Bovine Serum	Albumin	
pprox. Protein oncentrations	IgG concentration 0.1	mg/ml

Specificity

Mouse anti Human CD19 antibody, clone LT19 recognizes human CD19 also known as T-cell surface antigen Leu-12 or B-lymphocyte surface antigen B4. CD19 is a ~95 kDa type I single pass transmembrane glycoprotein expressed on follicular dendritic cells and B-cells during maturation but is lost on development into plasma cells (de Rie *et al.* 1989).

CD19 is the broadest lineage specific marker for B cells and functions as a B-cell co-receptor in conjunction with CD21 (<u>Bradbury et al. 1992</u>), CD9, CD81 and CD82 (<u>Horváth et al. 1998</u>). CD19 is implicated in the down-regulation of B cell growth and proliferation (Pezzutto et al. 1987).

Flow Cytometry

Use 10ul of the suggested working dilution to label 100ul of lysed whole peripheral blood.

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee	12 months from date of despatch
