**Entrez Gene:**

**Specificity**

**Mouse anti Human CD19 antibody, clone LT19** recognizes human CD19 also known as T-cell surface antigen Leu-12 or B-lymphocyte surface antigen B4. CD19 is a ~95 kDa type I single pass transmembrane glycoprotein expressed on follicular dendritic cells and B-cells during maturation but is lost on development into plasma cells ([de Rie \*et al.\* 1989](#)).

CD19 is the broadest lineage specific marker for B cells and functions as a B-cell co-receptor in conjunction with CD21 ([Bradbury \*et al.\* 1992](#)), CD9, CD81 and CD82 ([Horváth \*et al.\* 1998](#)). CD19 is implicated in the down-regulation of B cell growth and proliferation ([Pezzutto \*et al.\* 1987](#)).

**Flow Cytometry**

Use 5ul of the suggested working dilution to label 10<sup>6</sup> cells in 100ul. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
