

# Datasheet: MCA2028T BATCH NUMBER 163601

Description:MOUSE ANTI HUMAN CD29Specificity:CD29Other names:INTEGRIN BETA 1 CHAINFormat:PurifiedProduct Type:Monoclonal AntibodyClone:12G10Isotype:IgG1Quantity:25 μg		
Other names:INTEGRIN BETA 1 CHAINFormat:PurifiedProduct Type:Monoclonal AntibodyClone:12G10Isotype:IgG1	Description:	MOUSE ANTI HUMAN CD29
Format:PurifiedProduct Type:Monoclonal AntibodyClone:12G10Isotype:IgG1	Specificity:	CD29
Product Type:Monoclonal AntibodyClone:12G10Isotype:IgG1	Other names:	INTEGRIN BETA 1 CHAIN
Clone:12G10Isotype:IgG1	Format:	Purified
Isotype: IgG1	Product Type:	Monoclonal Antibody
	Clone:	12G10
Quantity: 25 µg	Isotype:	lgG1
	Quantity:	25 µg

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further						
	information. For general	•					
	e e	rad-antibodies.com/protocols.					
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry	•			1/25 - 1/50		
	Immunohistology - Frozen	-					
	Immunohistology - Paraffin						
	ELISA	-			10ug/ml		
	Immunofluorescence	-					
Target Species	system using appropriate Human	5 nogulive	, positive				
Species Cross	Reacts with: Mink						
Reactivity	Does not react with:Rat, Mouse						
	<b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
	personal communication	s from the	e originato	· •	wed publications or		
Product Form	personal communication	s from the	e originatc	· •	wed publications or		

	supernatant				
Buffer Solution	Phosphate buffered saline				
Preservative Stabilisers	0.09% Sodium Azide				
Carrier Free	Yes				
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml				
Immunogen	Purified human beta1 integrin preparation from HT1080 fibrosarcoma cell extract				
External Database Links	UniProt: <u>P05556</u> <u>Related reagents</u> Entrez Gene: <u>3688</u> ITGB1 <u>Related reagents</u>				
Synonyms	FNRB, MDF2, MSK12				
RRID	AB_1101776				
Fusion Partners	Spleen cells from an immunised BALB/c mice were fused with cells of the X63/Ag8.653 mouse myeloma cell line				
Specificity	<b>Mouse anti Human CD29 monoclonal antibody, clone 12G10</b> recognizes human CD29 also known as beta1 integrin or VLA-4 subunit alpha. CD29 is a ~130 kDa under reducing, ~115 kDa under non-reducing conditions single pass type I transmembrane glycoprotein. CD29 acts as the common beta subunit of the heterodimeric very late antigens 1-6, complexing with CD49a-f respectively where it forms part of the receptors for laminin , collagen and fibronectin. the VLA heterodimers mediate cell-cell and cell-matrix interactions.				
	Mouse anti Human CD29, clone 12G10 binding to cells adhering via VLA-4 results in actin cytoskeletal disruption and subsequent inhibition of attachment and spreading whilst 12G10 binding to cells adhering via VLA-5 results in enhancement of both these processes (Humphries <i>et al.</i> 2005). Clone 12G10 enhances alpha 5 beta 1-fibronectin interactions and binds to a region of CD25 containing the binding epitopes of several other anti CD29 antibody clones. However, unlike these, binding of 12G10 is enhanced in the presence of ligands such as fibronectin fragments (Mould <i>et al.</i> 1995). Binding of antibody clone 12G10 to the integrin $\beta$ 1 subunit is affected by divalent cations and the binding epitope appears to be located around residues 207-218 in the b1 subunit putative A-domain (Mould <i>et al.</i> 1998).
