

Datasheet: MCA2078PET

Description:	RAT ANTI MOUSE CD120a:RPE
Specificity:	CD120a
Other names:	TNF RECEPTOR TYPE I
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	HM104
Isotype:	IgG2a
Quantity:	25 TESTS

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Mouse		
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	RPE 488nm laser	496	578
Preparation	Purified IgG prepared by ion exchange chromatography.		
Buffer Solution	Phosphate buffered saline		
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)		
External Database Links	UniProt: P25118 Related reagents		

Entrez Gene:[21937](#) [Tnfrsf1a](#) [Related reagents](#)

Synonyms	Tnfr1, Tnfr-1
-----------------	---------------

RRID	AB_2241020
-------------	------------

Specificity	<p>Rat anti Mouse CD120a antibody, clone HM104 recognizes an extracellular region of mouse CD120a, also known as TNF receptor type I (TNFR1). TNFR1 is an ubiquitously expressed transmembrane glycoprotein and member of the tumor necrosis factor receptor (TNFR) superfamily, which plays a key role in regulating the inflammatory response, acting as a receptor for tumor necrosis factor alpha (TNF-alpha) and lymphotoxin-alpha (TNF-beta).</p> <p>CD120a also plays a role in apoptosis, cytokine induction, cell differentiation, tumor necrosis and early stages of graft-versus-host disease, and its soluble form sTNFR1, acts as an inhibitor of TNF-alpha induced responses by acting as a decoy receptor.</p>
--------------------	--

Flow Cytometry	<p>Use 10ul of the suggested working dilution to label 10⁶ cells in 100ul.</p> <p>The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity fc receptors. This may be reduced by using SeroBlock FcR (BUF041A/B).</p>
-----------------------	--
