# Datasheet: MCA2113 BATCH NUMBER 150704

Description:	MOUSE ANTI HUMAN CD46
Specificity:	CD46
Other names:	MEMBRANE CO-FACTOR PROTEIN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	MEM-258
lsotype:	lgG1
Quantity:	0.2 mg

## **Product Details**

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u>.

	rau-antiboules.com/proto	<u></u>				
		Yes	No	Not Determined	Suggested Dilution	
	Flow Cytometry				1/10 - 1/50	
	Immunohistology - Frozen			•		
	Immunohistology - Paraffin					
	ELISA			•		
	Immunoprecipitation					
	Western Blotting	-			Non reducing conditions	
	Immunofluorescence					
	Functional Assays (1)					
	Where this antibody has not been tested for use in a particular technique this does not					
	necessarily exclude its use in such procedures. It is recommended that the user titrates					
	the antibody for use in their own system using appropriate negative/positive controls.					
	(1)This product contains sodium azide, removal by dialysis is recommended prior					
	to use in functional assays. Bio-Rad recommend the use of <u>EQU003</u> for this					
	purpose.					
rget Species	Human					

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	0.09% Sodium Azide
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	HPB-ALL cell line.

Synonyms	MCP, MIC10
RRID	AB_323983
Specificity	<ul> <li>Mouse anti Human CD46 antibody, clone MEM-258 recognizes the human CD46 cell surface antigen, also known as membrane co-factor protein (MCP), Trophoblast leukocyte common antigen or TLX. CD46 is a 392 amino acid (including a 34 aa signal peptide) ~43-60 kDa single pass type 1 transmembrane glysoprotein expressed by all cell types with the exception of erythrocytes.</li> <li>CD46 functions as areceptor for complement and inhibitor of complement activation, limiting the formation and activity of C3 convertases. CD46 is expressed by all nucleated cells, often as multiple isoforms (Seya <i>et al.</i> 1993) on the same cells. The molecule is also expressed by sperm and may be important in the process of fertilisation (Carver-Ward <i>et al.</i> 1996).</li> </ul>
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> or 100ul whole blood.

Storage Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2113 10040
Regulatory	For research purposes only
