Specificity	<p>Mouse anti Human granzyme B antibody, clone GB10 recognizes the serine protease Granzyme B, which is expressed within the granules of cytolytic lymphocytes (CTLs).</p> <p>Granzyme B plays a key role in the induction of apoptosis by CTLs. After delivery to the target cell Granzyme B activates the cascade of caspases that finally results in cell death.</p>
ELISA	Mouse anti Human granzyme B antibody, clone GB10 has been reported to function as a detection reagent in sandwich ELISA assays for soluble Granzyme B in conjunction with Mouse anti Human granzyme B antibody, clone GB11 (MCA2120) used as a capture reagent.
