# Datasheet: MCA2120 BATCH NUMBER 161827

Description:	MOUSE ANTI GRANZYME B
Specificity:	GRANZYME B
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	GB11
lsotype:	lgG1
Quantity:	0.1 mg

## **Product Details**

Applications This product has been reported to				ne following applicatior	ns. This information is		
	derived from testing withi	derived from testing within our laboratories, peer-reviewed publications or personal					
	communications from the	communications from the originators. Please refer to references indicated for further					
	information. For general	protocol re	ecommen	dations, please visit <u>w</u>	ww.bio-

		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry (1)	-			1/10 - 1/100		
	Immunohistology - Frozen	-					
	Immunohistology - Paraffin			•			
	ELISA	•			2ug/ml - 5ug/ml		
	Immunoprecipitation	-					
	Western Blotting			•			
	Immunofluorescence	-					
	Where this product has not been tested for use in a particular technique this does not						
	necessarily exclude its us	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own					
	a guide only. It is recomn						
	system using appropriate negative/positive controls.						
	(1) Membrane permeabilisation is required for this application. Bio-Rad						
	recommends the use of Leucoperm <sup>™</sup> (Product Code <u>BUF09</u> ) for this purpose.						
Target Species	Human						
Species Cross Reactivity	Reacts with: Chimpanzee, Monkey, Rhesus Monkey <b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
Product Form	Purified IgG - liquid						

Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Tris buffered saline
Preservative Stabilisers	0.09% Sodium azide
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Purified human Granzyme B.
External Database Links	UniProt: <u>P10144</u> Related reagents Entrez Gene:
	<u>3002</u> GZMB <u>Related reagents</u>
Synonyms	CGL1, CSPB, CTLA1, GRB
RRID	AB_2114582
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the mouse SP2/0 myeloma cell line.
Specificity	<b>Mouse anti Granzyme B antibody, clone GB11</b> recognizes the serine protease Granzyme B, important in the induction of apoptosis in target cells by cytolytic lymphocytes (CTLs).
	Granzyme B plays a key role in the induction of apoptosis by CTLs. After delivery to the target cell, Granzyme B activates the cascade of caspases that finally results in cell death.
	Mouse anti Granzyme B antibody, clone GB11 is suitable for the detection of Granzyme B expressing cells by flow cytometry. In normal peripheral blood approximately 20% of CD8+ve T cells have been found to express Granzyme B.
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells or 100ul whole blood.
ELISA	This antibody has been reported to function as a capture reagent in sandwich ELISA assays for soluble Granzyme B in conjunction with biotin conjugated <u>GB10</u> as detection reagent.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10057 available at: https://www.bio-rad-antibodies.com/SDS/MCA2120 10057
Regulatory	For research purposes only
