

# Datasheet: MCA2127SBB675

Description:	MOUSE ANTI HUMAN CD25:StarBright Blue 675
Specificity:	CD25
Other names:	IL-2R ALPHA CHAIN
Format:	StarBright Blue 675
Product Type:	Monoclonal Antibody
Clone:	MEM-181
Isotype:	lgG1
Quantity:	100 TESTS/0.5ml

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry				Neat		
	Where this product has necessarily exclude its a guide only. It is recor system using appropria	use in such p nmended that	rocedur the use	res. Suggested workin er titrates the product f	g dilutions are given as		
Target Species	Human						
Product Form	Purified IgG conjugated to StarBright Blue 675 - liquid						
Max Ex/Em	Fluorophore	Excitation Ma	x (nm)	Emission Max (nm)			
	StarBright Blue 675	476		675			
Preparation	Purified IgG prepared I supernatant	by affinity chro	matogr	aphy on Protein A fron	n tissue culture		
Buffer Solution	Phosphate buffered sa	line					
Preservative	0.09% sodium azide (N	NaN <sub>3</sub> )					
Stabilisers	1% bovine serum albumin						
	0.1% Pluronic F68						
	0.1% PEG 3350						
	0.05% Tween 20						

Immunogen	Human PHA blasts; day 3 of culture.
External Database Links	UniProt: <u>P01589</u> <u>Related reagents</u> Entrez Gene: <u>3559</u> IL2RA <u>Related reagents</u>
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse P3.X63 Ag8.653 myeloma cell line.
Specificity	<ul> <li>Mouse anti Human CD25, clone MEM-181 recognizes the ~55 kDa alpha subunit of the human IL-2 receptor, also known as p55 or TAC antigen, CD25 is a type 1 transmembrane protein with two Sushi domains, also known as short concensus repeats (SCRs) or complement control protein (CCP) modules (Norman <i>et al.</i> 1991) located within its extracellular domain.</li> <li>The IL-2 receptor exists in three forms. A high affinity form consisting of a non-covalently linked heterodimer composed of the alpha subunit (CD25) and the IL-2 receptor beta subunit also known as CD122 or p75, a medium affinity beta subunit (CD122) monomer or a low affinity alpha (CD25) subunit monomer.</li> <li>CD25 is expressed by activated T lymphocytes and activated B lymphocytes responding to antigen or mitogen stimulation. CD25 is also expressed in some thymocytes and oligodendrocytes. In disease, elevated expression of CD25 in noted in a number of chronic inflammatory conditions, tuberculoid leprosy patients demonstrate markedly elevated levels of circulating CD25high FoxP3+ regulatory T cells (T-regs) (Attia <i>et al.</i> 2010).</li> </ul>
	Elevated levels of CD25 antigen expression are often seen in cases of <u>non-Hodgkin 's</u> l <u>ymphoma</u> and diffuse large B cell lymphoma ( <u>Fujiwara <i>et al</i>.2013</u> ).
Flow Cytometry	Use 5µl of the suggested working dilution to label 10 <sup>6</sup> cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
