Datasheet: MCA2142 **BATCH NUMBER 162943**

Description:	MOUSE ANTI HUMAN CD63
Specificity:	CD63
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	MEM-259
lsotype:	lgG1
Quantity:	0.2 mg

Product Details

Synonyms	MLA1, TSPAN30
RRID	AB_324562
Specificity	Mouse anti Human CD63 antibody, clone MEM-259 recognizes the CD63 cell surface antigen, also known as granulophysin, lysozomal associated membrane protein 3 (LAMP-3), Melanoma-associated antigen ME491, Ocular melanoma-associated antigen or tetraspanin-30. CD63 is a 238 amino acid, tetraspanin glycoprotein of ~40-60 kDa. CD63 is expressed by monocytes, macrophages, endothelial cells where it is a component of Weibel-Palade bodies (<u>Vischer <i>et al.</i> 1993</u>) and by a variety of cell lines. It is located intracellularly in lysosomal granules of platelets, being translocated to the surface upon activation. It may therefore by useful as a marker of platelet activation (<u>Hamamoto <i>et al.</i> 1994</u>). CD63 expression is also associated with melanoma development (<u>Radford <i>et al.</i> 1997</u>) and expression is rapidly down-regulated by progesterone in endometrial tissues (<u>Okada <i>et al.</i> 1999</u>).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul or 100ul whole blood.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.		
	Avoid repeated freezing and thawing as this may denature the antibody. Stor frost-free freezers is not recommended.	age in
