

Datasheet: MCA2152F BATCH NUMBER 1112R

Description:	MOUSE ANTI HUMAN CD282:FITC		
Specificity:	CD282		
Other names:	TLR2		
Format:	FITC		
Product Type:	Monoclonal Antibody		
Clone:	TLR2.3		
lsotype:	lgG2a		
Quantity:	0.1 mg		

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .					
		Yes No	Not Determined	Suggested Dilution		
	Flow Cytometry			Neat - 1/10		
	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.					
Target Species	Human					
Product Form	Purified IgG conjugated	to Fluorescein Iso	thiocyanate Isomer 1 (F	ITC) - liquid		
Max Ex/Em	Fluorophore I FITC	Excitation Max (nm) 490	Emission Max (nm) 525			
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant					
Buffer Solution	Phosphate buffered saline					
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum Albumin					
Approx. Protein Concentrations	IgG concentration 0.1 m	ng/ml				

Immunogen	CHO cell line transfected with human TLR2 (CD282).
External Database Links	UniProt: <u>O60603</u> <u>Related reagents</u> Entrez Gene: <u>7097</u> TLR2 <u>Related reagents</u>
Synonyms	TIL4
RRID	AB_324045
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the NS0 myeloma cell line.
Specificity	Mouse anti Human CD282 antibody, clone TL2.3 recognizes human TLR2, otherwise known as CD282. TLR2 is a member of the Toll-like receptor (TLR) family and is expressed primarily by peripheral blood monocytes. TLRs are expressed on the cell surface and the endocytic compartment and recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents. They also initiate cell signalling to induce production of cytokines necessary for the innate immunity and subsequent adaptive immunity. TLR2 is reported to respond to a diverse range of bacterial cell wall components, mediating the innate immune response in co-operation with MD-2. Mouse anti Human CD282 antibody, clone TL2.1 is reported to block TLR2 function.
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul.

Storage	Store at +4°C or at -20°C if preferred.
	This product should be stored undiluted.
	Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
	Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/MCA2152F 10041
Regulatory	For research purposes only
