

Datasheet: MCA2194

BATCH NUMBER 166642

Description:	MOUSE ANTI FELINE CORONAVIRUS
Specificity:	CORONAVIRUS
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	FIPV3-70
Isotype:	IgG2a
Quantity:	0.25 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen	▪			
Immunohistology - Paraffin (1)	▪			
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Viral
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	< 0.1% sodium azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Coronavirus cocktail.
RRID	AB_323968
Specificity	<p>Mouse anti Feline Coronavirus antibody, clone FIPV3-70 reacts with feline infectious peritonitis virus (FIPV) type 1 and 2 and is specific for the nucleocapsid. It is also known to react with canine coronavirus (CCV), pig coronavirus transmissible gastroenteritis virus (TGEV) and ferret coronavirus. Some specific activity has been detected against bovine coronavirus (BCV).</p> <p>Mouse anti Feline Coronavirus antibody, clone FIPV3-70 does not recognize Feline Leukemia virus, Feline Immunodeficiency virus, Feline Calcivirus, Feline Herpes virus, Canine Adenovirus (type 2), Canine Distemper virus, Canine Parvovirus and Canine Parainfluenza virus.</p> <p>It has been reported that clone FIPV3 recognizes the SARS-Cov-2 core protein (Nardacci et al. 2020).</p>
Western Blotting	Under reducing conditions Mouse anti Feline Coronavirus antibody, clone FIPV3-70 detects a band of 50-56 kDa that represents the nucleocapsid.protein and an additional band 46 kDa in reducing gels with CCV as antigen.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at

-20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
