**Datasheet: MCA2200G**

**Description:** MOUSE ANTI C-MYC

**Specificity:** C-MYC

**Format:** Purified

**Product Type:** Monoclonal Antibody

**Clone:** 9E10

**Isotype:** IgG1

**Quantity:** 2 mg

**RRID** AB_1102510

**Applications**

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own systems using appropriate negative/positive controls.

(1) Membrane permeabilisation is required for this application. Bio-Rad recommends the use of Leucoperm™ (Product Code BUF09) for this purpose.

(2) 9E10 recognizes c-myc under non-reducing conditions

**Target Species** Human

**Product Form** Purified IgG - liquid

**Preparation** Purified IgG prepared by affinity chromatography on Protein G

**Buffer Solution** Phosphate buffered saline

**Preservative Stabilisers** 0.09% Sodium Azide

**Carrier Free** Yes

**Approx. Protein** IgG concentration 1.0 mg/ml
Concentrations

Immunogen
Synthetic peptide sequence corresponding to the C-terminal region (residues 408-439) of human c-myc conjugated to keyhole limpet hemocyanin.

Synonyms
BHLHE39

Fusion Partners
Spleen cells from immunised BALB/c mice were fused with cells of the SP2/0 myeloma cell line.

Specificity
Mouse anti c-myc antibody, clone 9E10 detects the p62c-myc proto-oncogene protein, which is involved in the regulation of the cell cycle and cell growth. C-myc is primarily located to the cell nucleus, but has also been shown to localised to the cytoplasm in several cell lines (Craig et al. 1993). Overexpression of c-myc has been reported in a wide variety of human cancers (Nesbit et al. 1999).

Mouse anti c-myc antibody, clone 9E10 recognizes the sequence EQKLISEEDL and may be used to detect proteins and peptides labelled with molecular tags containing this sequence (Hilpert et al. 2001).

Flow Cytometry
Use 10ul of the suggested working dilution to label 1x10^6 cells in 100ul.

Immunohistology
This product does not require protein digestion pre-treatment of paraffin sections prior to staining. This product does not require antigen retrieval using heat treatment prior to staining of paraffin sections.

Storage
Store at +4°C or at -20°C if preferred.
This product should be stored undiluted.
Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee
18 months from date of despatch.
