

## Datasheet: MCA2245PE BATCH NUMBER 0612R

| Description:  | RAT ANTI MOUSE CD41:RPE |
|---------------|-------------------------|
| Specificity:  | CD41                    |
| Other names:  | INTEGRIN ALPHA IIB      |
| Format:       | RPE                     |
| Product Type: | Monoclonal Antibody     |
| Clone:        | MWReg30                 |
| Isotype:      | lgG1                    |
| Quantity:     | 100 TESTS               |

## **Product Details**

| Applications                | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . |                |         |                  |                    |
|-----------------------------|--|----------------|---------|------------------|--------------------|
|                             |  | Yes            | No      | Not Determined   | Suggested Dilution |
|                             | Flow Cytometry   | -              |         |                  | Neat               |
|                             | Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.   |                |         |                  |                    |
| Target Species              | Mouse  |                |         |                  |                    |
| Product Form                | Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized  |                |         |                  |                    |
| Reconstitution              | Reconstitute with 1 ml distilled water   |                |         |                  |                    |
| Max Ex/Em                   | Fluorophore  | Excitation Max | (nm) En | nission Max (nm) |                    |
|                             | RPE 488nm laser  | 496            |         | 578              |                    |
| Preparation                 | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant  |                |         |                  |                    |
| Buffer Solution             | Phosphate buffered sa  | line           |         |                  |                    |
| Preservative<br>Stabilisers | 0.09% Sodium Azide<br>1% Bovine Serum A  | Albumin        |         |                  |                    |

|                            | 5% Sucrose  |

| Specificity                | <b>Rat anti Mouse CD41 antibody, clone MWReg30</b> recognizes the mouse integrin alpha IIb subunit CD41. CD41 is a ~125 kDa single pass type 1 transmembrane glycoprotein expressed by platelets, megakaryocytes ( <u>Zhang <i>et al.</i> 2007</u> ), mast cells ( <u>Berlanga <i>et al.</i> 2005</u> ), and hematopoietic progenitors ( <u>Mitjavila-Garcia <i>et al.</i> 2002</u> ). CD41 forms a heterodimer with <u>CD61</u> .  |
|                            | The CD41/CD61 complex is important for platelet adhesion and aggregation ( <u>Patel <i>et al.</i></u> 2003) acting as a receptor for many extracellular matrix proteins including fibronectin, thrombospondin and vitronectin ( <u>Weisel <i>et al.</i></u> 1992).  |
|                            | Rat anti mouse CD41, clone MWReg30 has been reported to inhibit PMA induced aggregation <i>in vitro</i> and to induce hypothermia <i>in vivo</i> ( <u>Nieswandt <i>et al.</i> 1999</u> ).   |
| Flow Cytometry             | Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.   |
|                            | The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity fc receptors. This may be reduced by using SeroBlock FcR ( <u>BUF041A/B</u> ).  |
