

Datasheet: MCA2274A647

Description:	RAT ANTI MOUSE CD150:Alexa Fluor® 647
Specificity:	CD150
Other names:	SLAM
Format:	ALEXA FLUOR® 647
Product Type:	Monoclonal Antibody
Clone:	9D1
Isotype:	IgG1
Quantity:	100 TESTS/1ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Mouse		
Product Form	Purified IgG conjugated to Alexa Fluor® 647 - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	Alexa Fluor®647	650	665
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant		
Buffer Solution	Phosphate buffered saline		
Preservative	0.09% Sodium Azide		
Stabilisers	1% Bovine Serum Albumin		
Approx. Protein Concentrations	IgG concentration 0.05 mg/ml		

Immunogen	CHO cells stably transfected with mouse CD150
External Database Links	<p>UniProt: Q9QUM4 Related reagents</p> <p>Entrez Gene: 27218 Slamf1 Related reagents</p>
Synonyms	Slam
RRID	AB_321144
Fusion Partners	Spleen cells from immunised rats were fused with cells of a myeloma cell line.
Specificity	<p>Rat anti Mouse CD150 antibody, clone 9D1 recognizes murine CD150, also known as signaling lymphocyte activation molecule (SLAM) . Murine CD150 is a 75 kDa cell surface glycoprotein that is expressed on T-cells and B-cells, and is upregulated on activated T-cells and stimulated macrophages. The extracellular domain of CD150 is the receptor for the measles virus (Erlenhoefer et al. 2001) and acts as a co-activator on T-cells and B-cells.</p> <p>Rat anti Mouse CD150 antibody, clone 9D1 has functional activity (Howie et al. 2002).</p>
Flow Cytometry	<p>Use 10ul of the suggested working dilution to label 10⁶ cells in 100ul.</p> <p>The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity fc receptors. This may be reduced by using SeroBlock FcR (BUF041A/B).</p>
