

Datasheet: MCA2277 BATCH NUMBER 167589

Description:MOUSE ANTI DENGUE VIRUSSpecificity:DENGUE VIRUSFormat:PurifiedProduct Type:Monoclonal AntibodyClone:Dengue 1-11(3)Isotype:IgG2aQuantity:0.25 mg		
Format: Purified Product Type: Monoclonal Antibody Clone: Dengue 1-11(3) Isotype: IgG2a	Description:	MOUSE ANTI DENGUE VIRUS
Product Type: Monoclonal Antibody Clone: Dengue 1-11(3) Isotype: IgG2a	Specificity:	DENGUE VIRUS
Clone: Dengue 1-11(3) Isotype: IgG2a	Format:	Purified
Isotype: IgG2a	Product Type:	Monoclonal Antibody
	Clone:	Dengue 1-11(3)
Quantity: 0.25 mg	Isotype:	lgG2a
•	Quantity:	0.25 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				
Immunohistology - Frozen			•	
Immunohistology - Paraffin (1)				
ELISA	•			
Immunoprecipitation			•	
Western Blotting				
Immunofluorescence	-			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Viral	
Product Form	Purified IgG - liquid	
Preparation	Purified IgG prepared by affinity chromatography on Protein A supernatant	A from tissue culture
Buffer Solution	Phosphate buffered saline	

Preservative Stabilisers	<0.1% sodium azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
RRID	AB_609623

Specificity

Mouse anti-Dengue virus antibody, clone Dengue 1-11 (3) recognizes all four dengue virus serotypes (DEN-1, DEN-2, DEN-3 and DEN-4) of the genus *Flavivirus*.

Mouse anti-Dengue virus antibody, clone Dengue 1-11 (3) binds strongly to subtypes 1 and 2. It recognizes subtype 3 more weakly. Among the four subtypes, subtype 4 is recognized the least strongly and some customers have reported no recognition of subtype 4.

The dengue virus is responsible for the tropical and sub-tropical diseases, dengue (DF) and dengue haemorrhagic fever (DHF), transmitted to individuals through the bite of the *Aedes* mosquito. The global distribution of dengue is expanding and comparable to that of malaria, with symptoms ranging from a mild viral syndrome of high fever, rash, headache, fatigue and muscle and joint pain, to the more severe and sometimes fatal DHF. Each dengue virus serotype is antigenically distinct, such that infection only provides an individual with immunity to the causative serotype, with the possibility of further infection by a different serotype or even multiple serotypes.

Western Blotting

This antibody detects an anti-E/envelope specific band of \sim 61 kDa under reducing conditions. A weak secondary band of \sim 80 kDa may also be apparent.

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2277 10040
Regulatory	For research purposes only
