

## Datasheet: MCA2388P647T

<b>Description:</b>	RAT ANTI MOUSE CD31:RPE-Alexa Fluor® 647
<b>Specificity:</b>	CD31
<b>Other names:</b>	PECAM-1
<b>Format:</b>	RPE-ALEXA FLUOR® 647
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	ER-MP12
<b>Isotype:</b>	IgG2a
<b>Quantity:</b>	25 TESTS

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	■			Neat - 1/5

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Mouse									
<b>Product Form</b>	Purified IgG conjugated to R. Phycoerythrin (RPE) Alexa Fluor®647 - liquid									
<b>Max Ex/Em</b>	<table border="1"> <thead> <tr> <th>Fluorophore</th> <th>Excitation Max (nm)</th> <th>Emission Max (nm)</th> </tr> </thead> <tbody> <tr> <td>RPE-Alexa Fluor®647 488nm laser</td> <td>496</td> <td>667</td> </tr> <tr> <td>RPE-Alexa Fluor®647 561nm laser</td> <td>546</td> <td>667</td> </tr> </tbody> </table>	Fluorophore	Excitation Max (nm)	Emission Max (nm)	RPE-Alexa Fluor®647 488nm laser	496	667	RPE-Alexa Fluor®647 561nm laser	546	667
Fluorophore	Excitation Max (nm)	Emission Max (nm)								
RPE-Alexa Fluor®647 488nm laser	496	667								
RPE-Alexa Fluor®647 561nm laser	546	667								
<b>Preparation</b>	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant									
<b>Buffer Solution</b>	Phosphate buffered saline									
<b>Preservative</b>	0.09% Sodium Azide									
<b>Stabilisers</b>	1% Bovine Serum Albumin 5% Sucrose									
<b>Immunogen</b>	BALB/c macrophage precursor cell hybrids									
<b>External Database Links</b>	<b>UniProt:</b> <a href="#">Q08481</a> <a href="#">Related reagents</a>									

**Entrez Gene:**

[18613](#) Pecam1 [Related reagents](#)

---

<b>Synonyms</b>	Pecam, Pecam-1
-----------------	----------------

---

<b>Fusion Partners</b>	Cells from immunised rats were fused with the cells of the rat Y3-Ag1.2.3 myeloma cell line
------------------------	---

---

<b>Specificity</b>	<p><b>Rat anti Mouse CD31 antibody, clone ER-MP12</b> recognizes mouse CD31, a 140 kDa cell surface glycoprotein that is expressed at high levels on endothelial cells, platelets and most leukocyte subpopulations.</p> <p>CD31 is also expressed on a major population of macrophage / dendritic cell precursors in the bone marrow. Studies show that clone ER-MP12 can be used in conjunction with clone ER-MP20 (<a href="#">MCA2389GA</a>) in two colour flow cytometric analysis, to identify different stages of myeloid progenitor cells in mouse bone marrow (<a href="#">de Bruijn et al. 1998</a>).</p>
--------------------	---

---

<b>Flow Cytometry</b>	<p>Use 10ul of the suggested working dilution to label 1x10<sup>6</sup> cells in 100ul.</p> <p>The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors. This may be reduced by using SeroBlock FcR (<a href="#">BUF041A/B</a>).</p>
-----------------------	--

---
